

Plasma Environment Plot Collection

Each plot is presented on its own page with its description placed directly beneath the image for easier reading and reference.

FIGURE 01

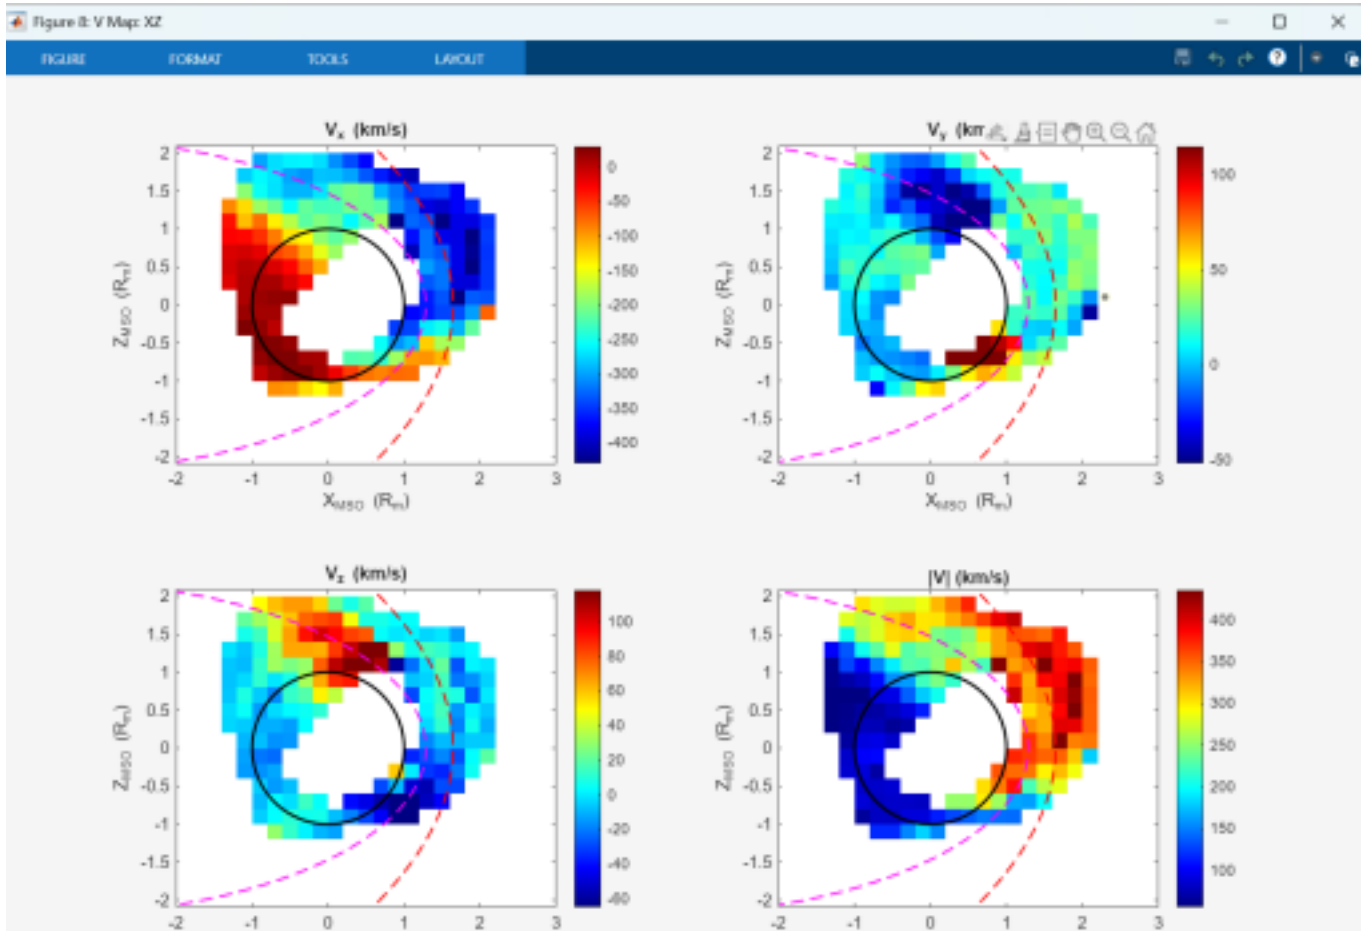

Ion density map in the YZ plane, showing the proton density distribution across the cross-tail projection.

FIGURE 02

Velocity map in the XY plane, showing the velocity components (V_x , V_y , V_z) and total speed ($|V|$) in km/s.

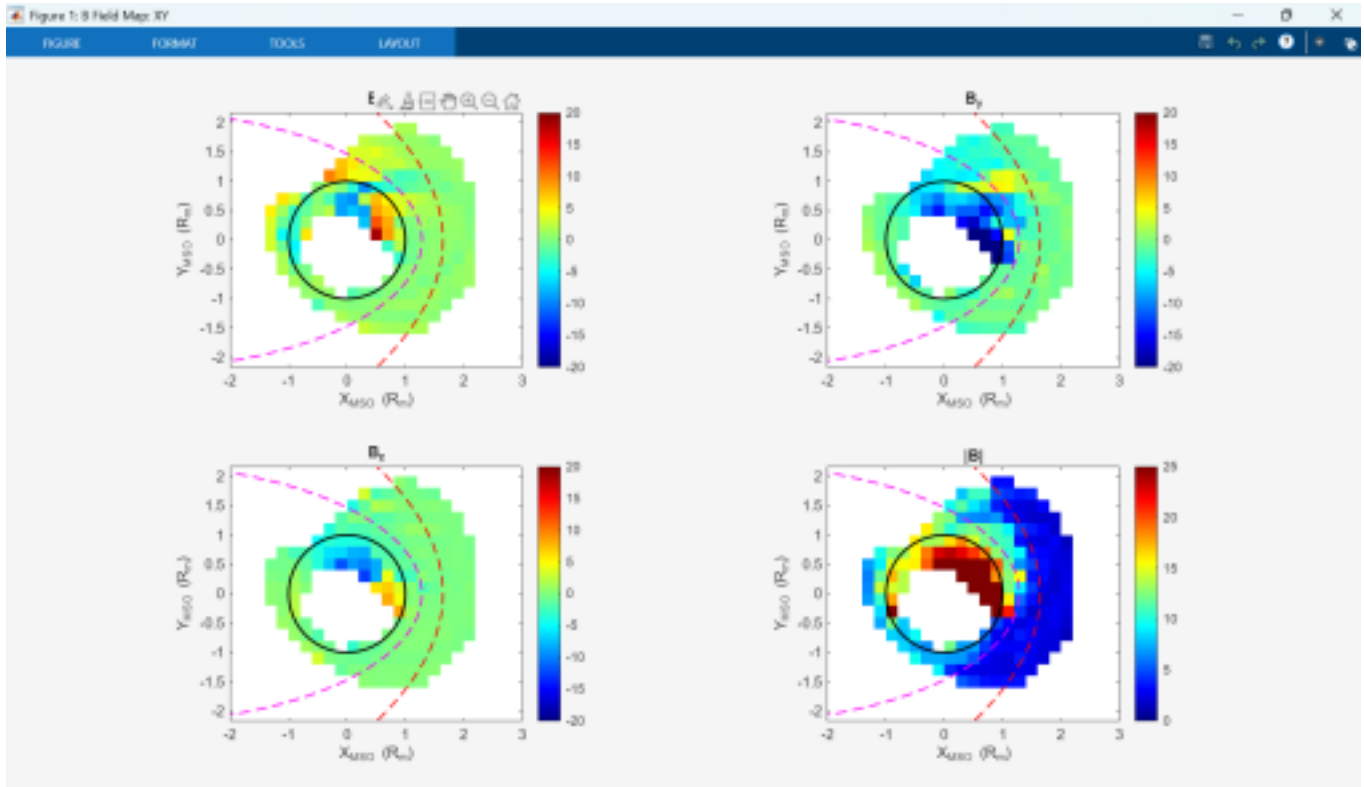

FIGURE 03

Velocity map in the XZ plane, showing the velocity components (V_x , V_y , V_z) and total speed ($|V|$) in km/s with boundaries.

MAGNETIC FIELD

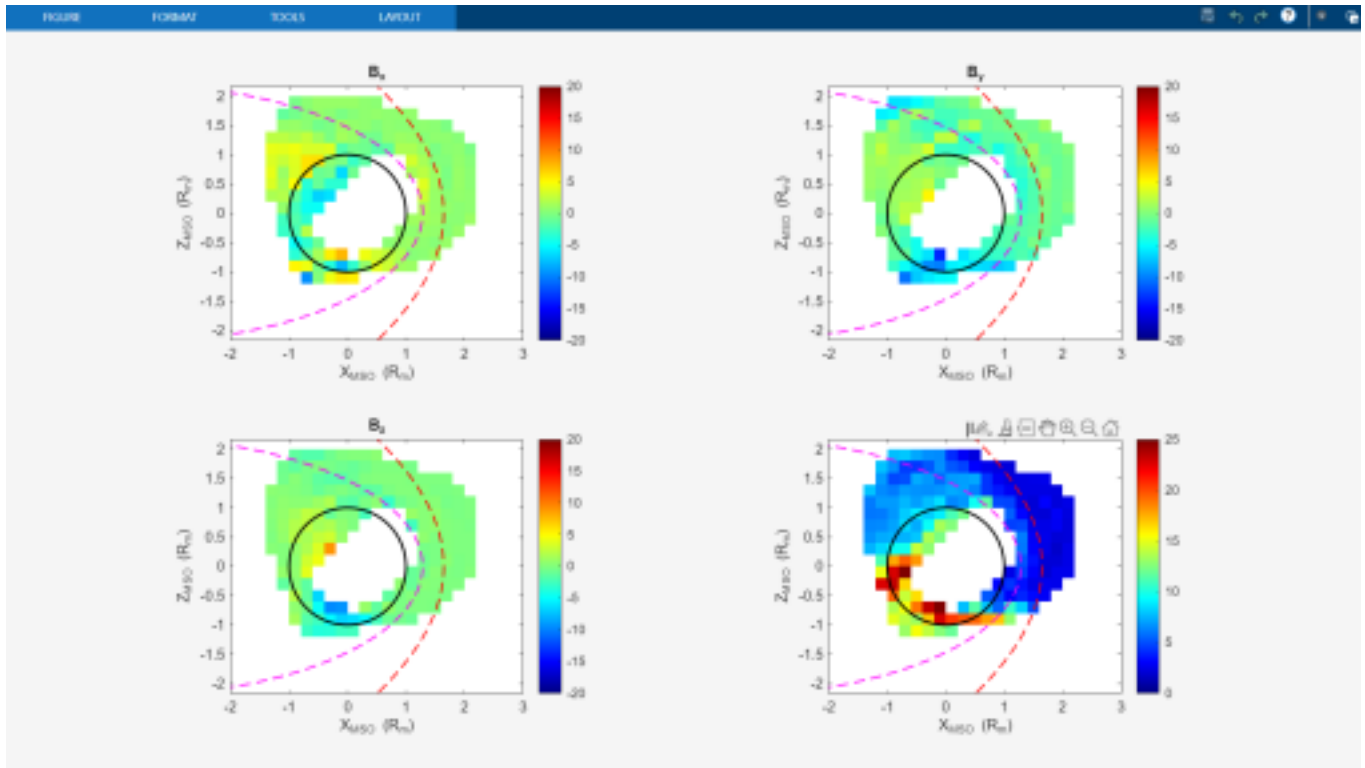

FIGURE 04

Magnetic field map in the XY plane, showing the magnetic field components (B_x , B_y , B_z) and magnitude ($|B|$) in nT.

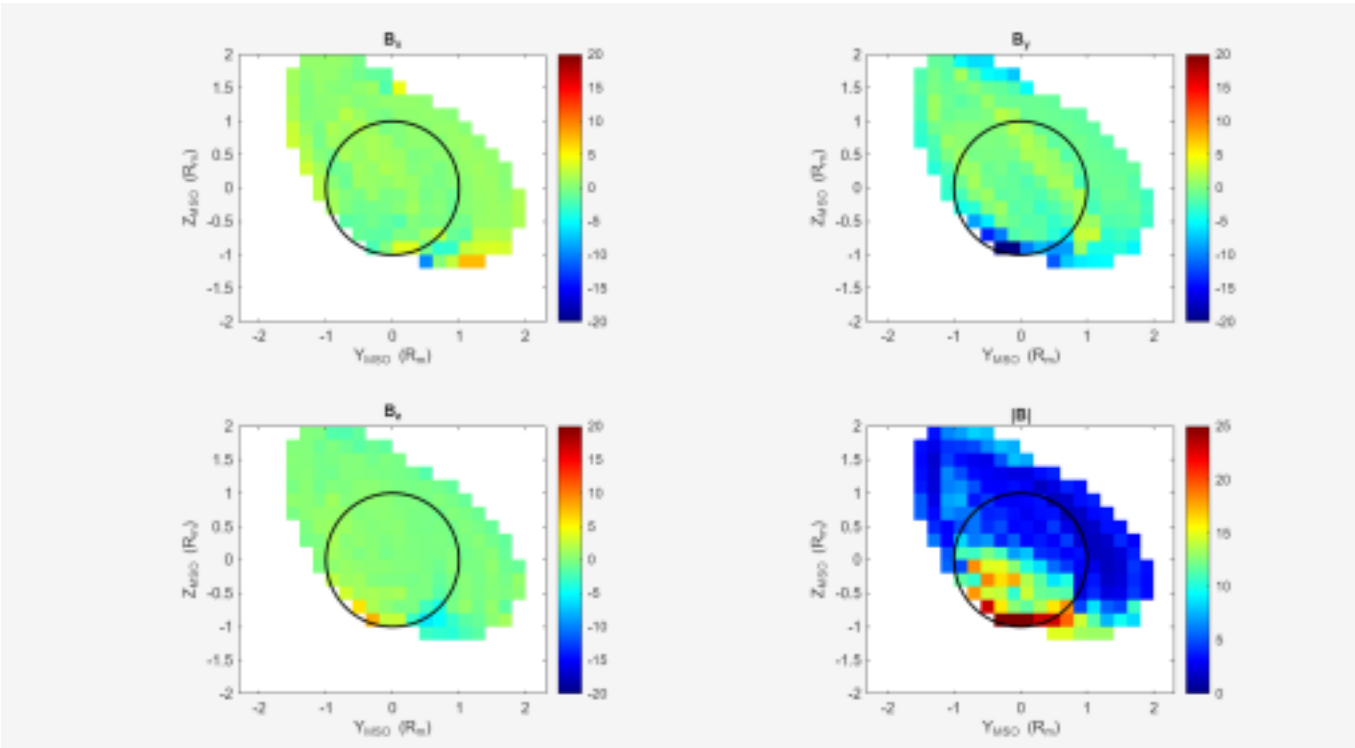

MAGNETIC FIELD

FIGURE 05

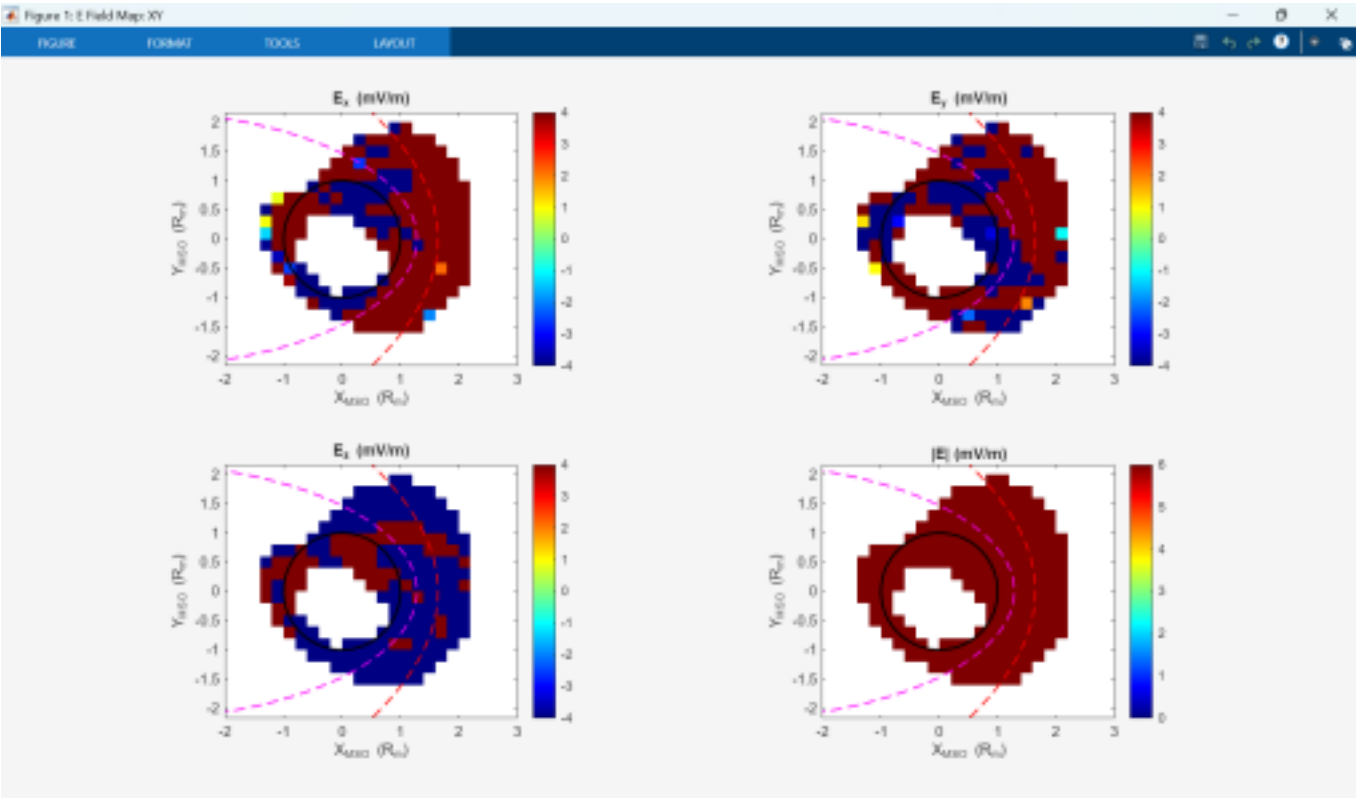

Magnetic field map in the XZ plane, showing the magnetic field components (B_x , B_y , B_z) and magnitude ($|B|$) in nT.

FIGURE 06

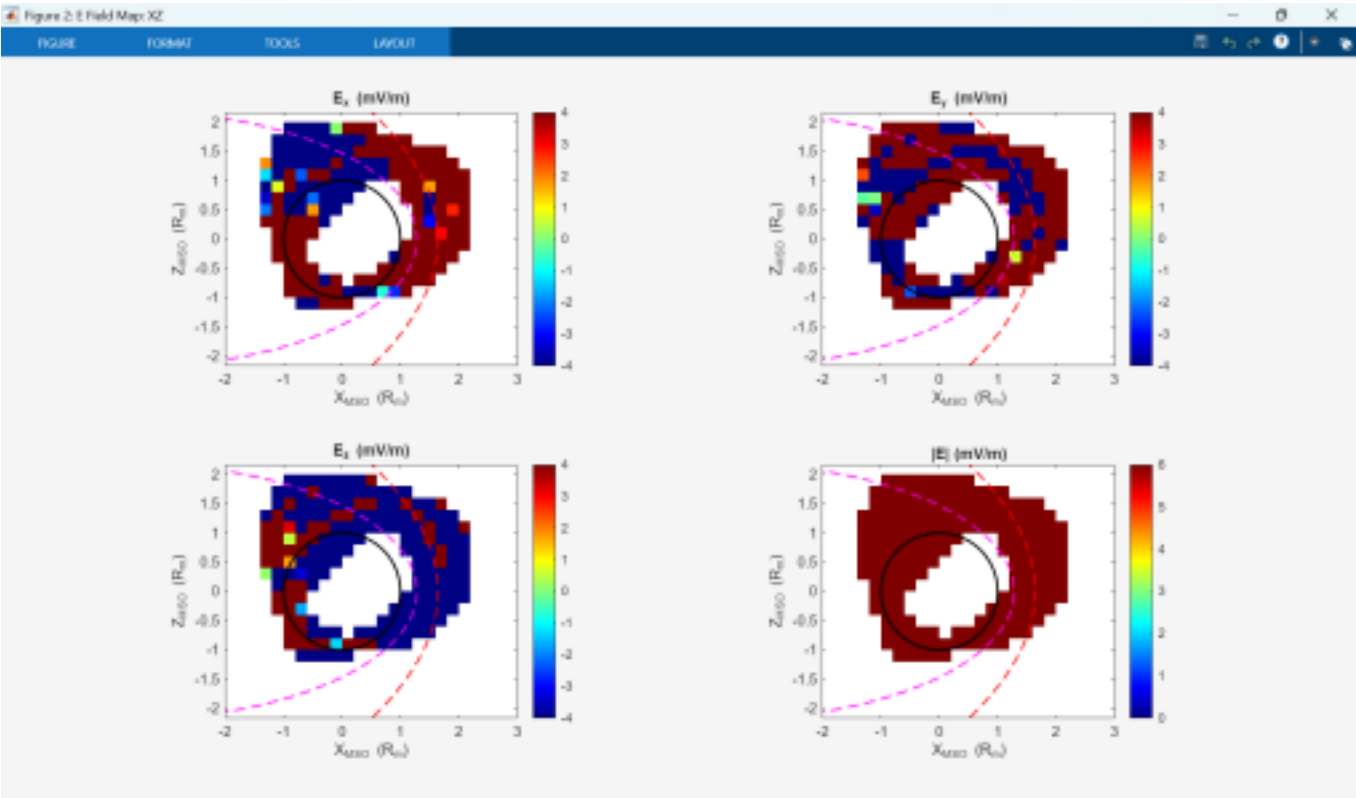

Magnetic field map in the YZ plane, showing the magnetic field components (B_x , B_y , B_z) and magnitude ($|B|$) in nT.

FIGURE 07

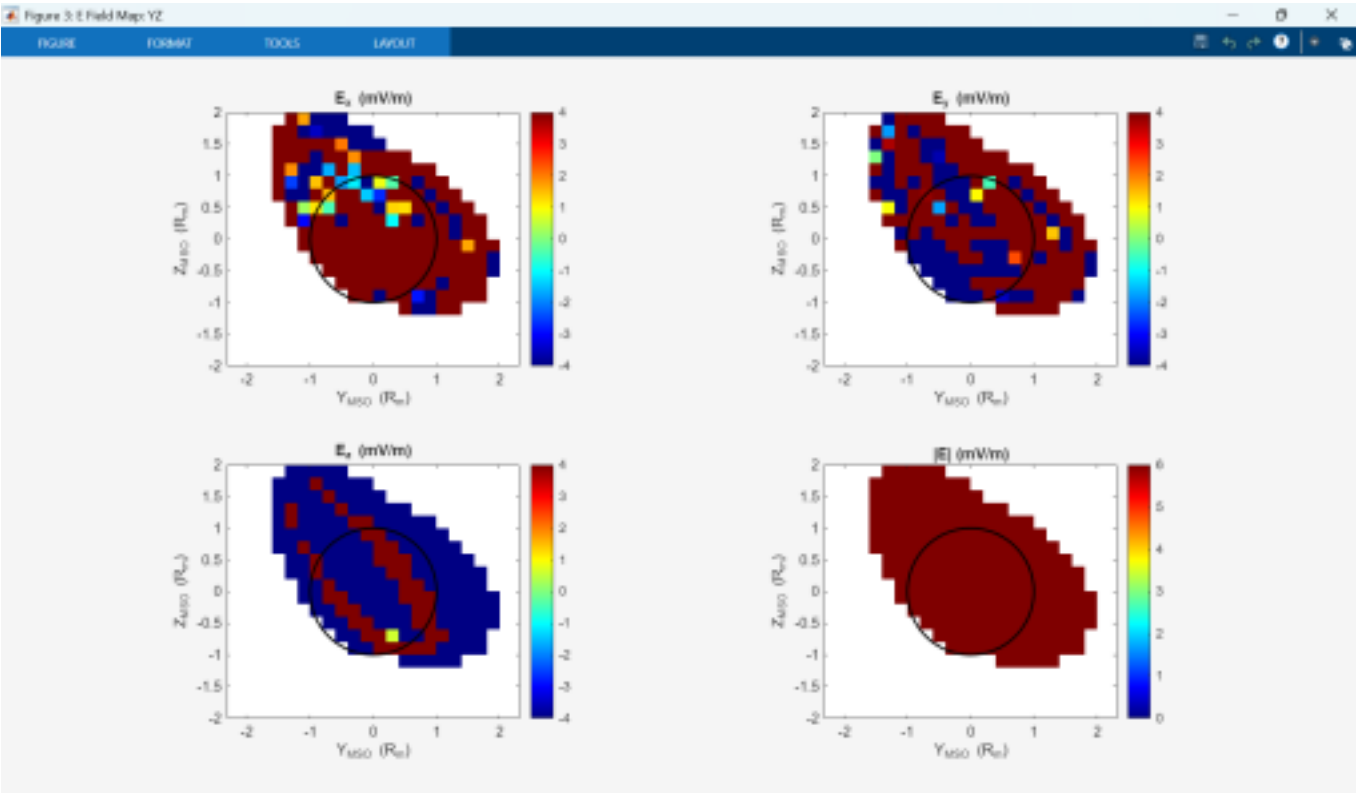

Convective electric field map in the XY plane, showing E_x , E_y , E_z and $|E|$ in mV/m. Description matched to the

FIGURE 08

Convective electric field map in the XZ plane, showing E_x , E_y , E_z and $|E|$ in mV/m. Description matched to the

FIGURE 09

Convective electric field map in the YZ plane, showing E_x , E_y , E_z and $|E|$ in mV/m. Description matched to the

FIGURE 10

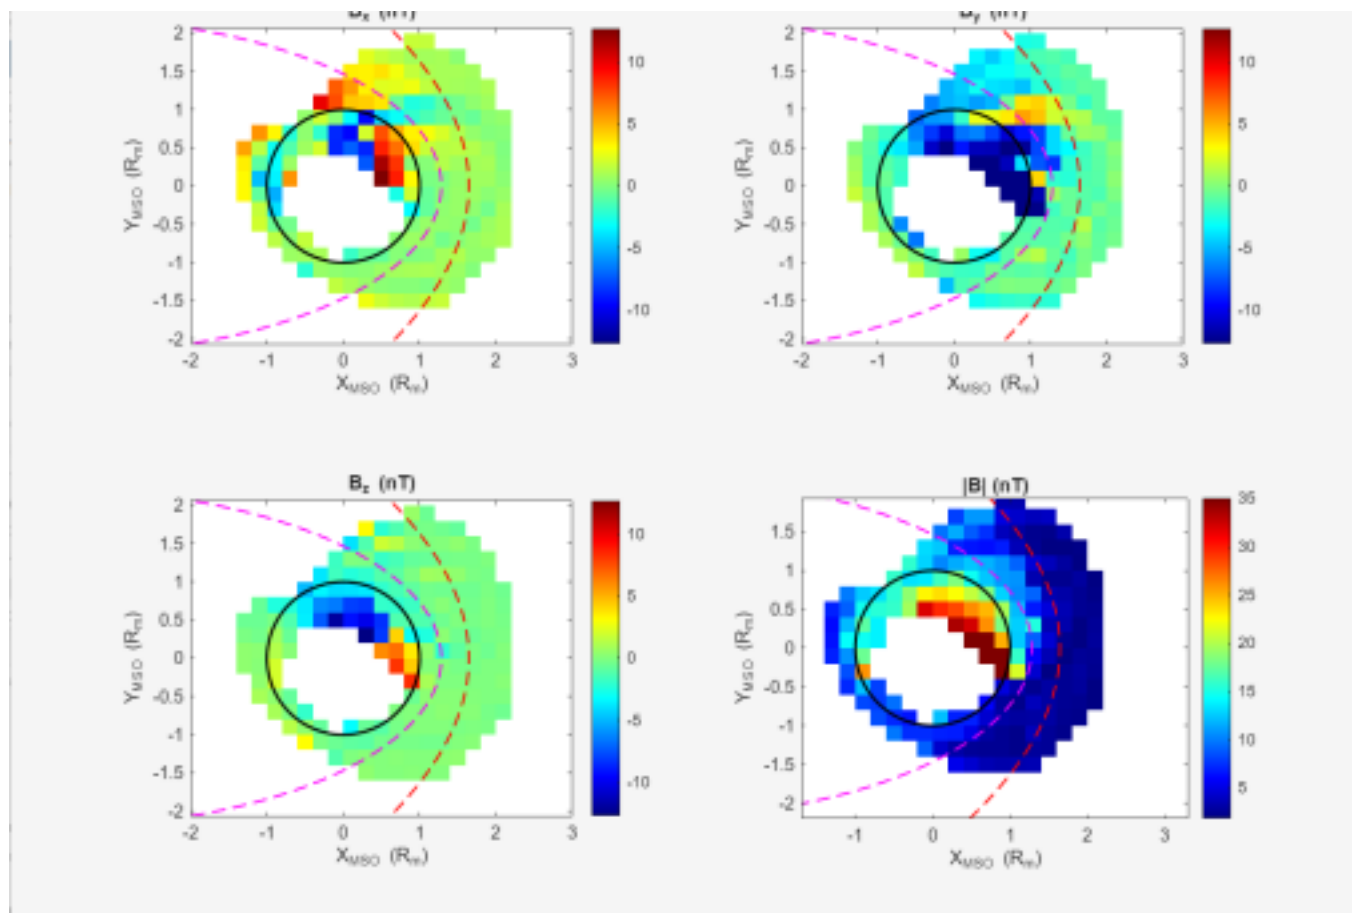

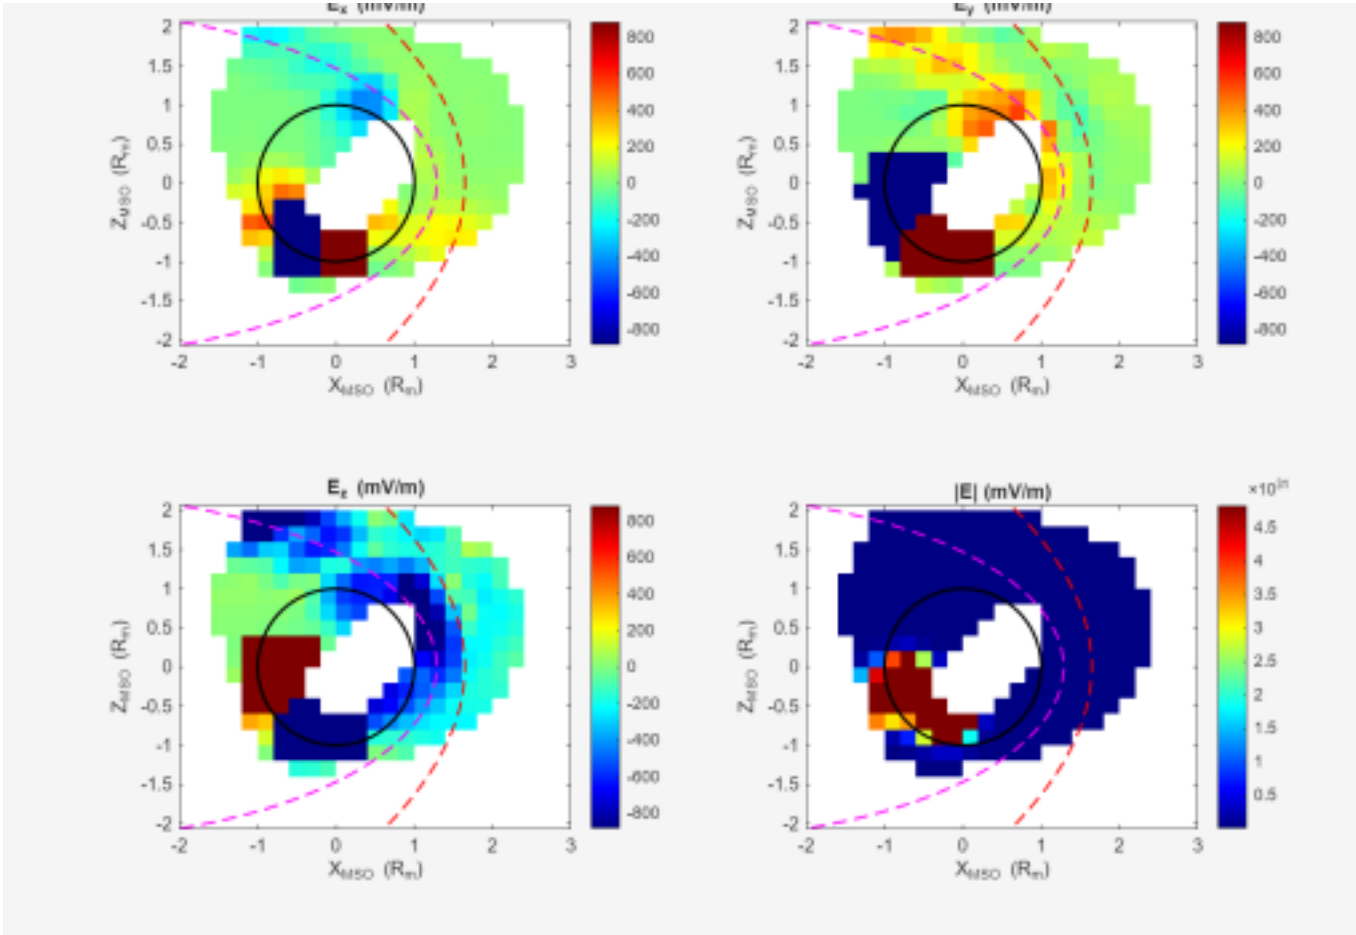

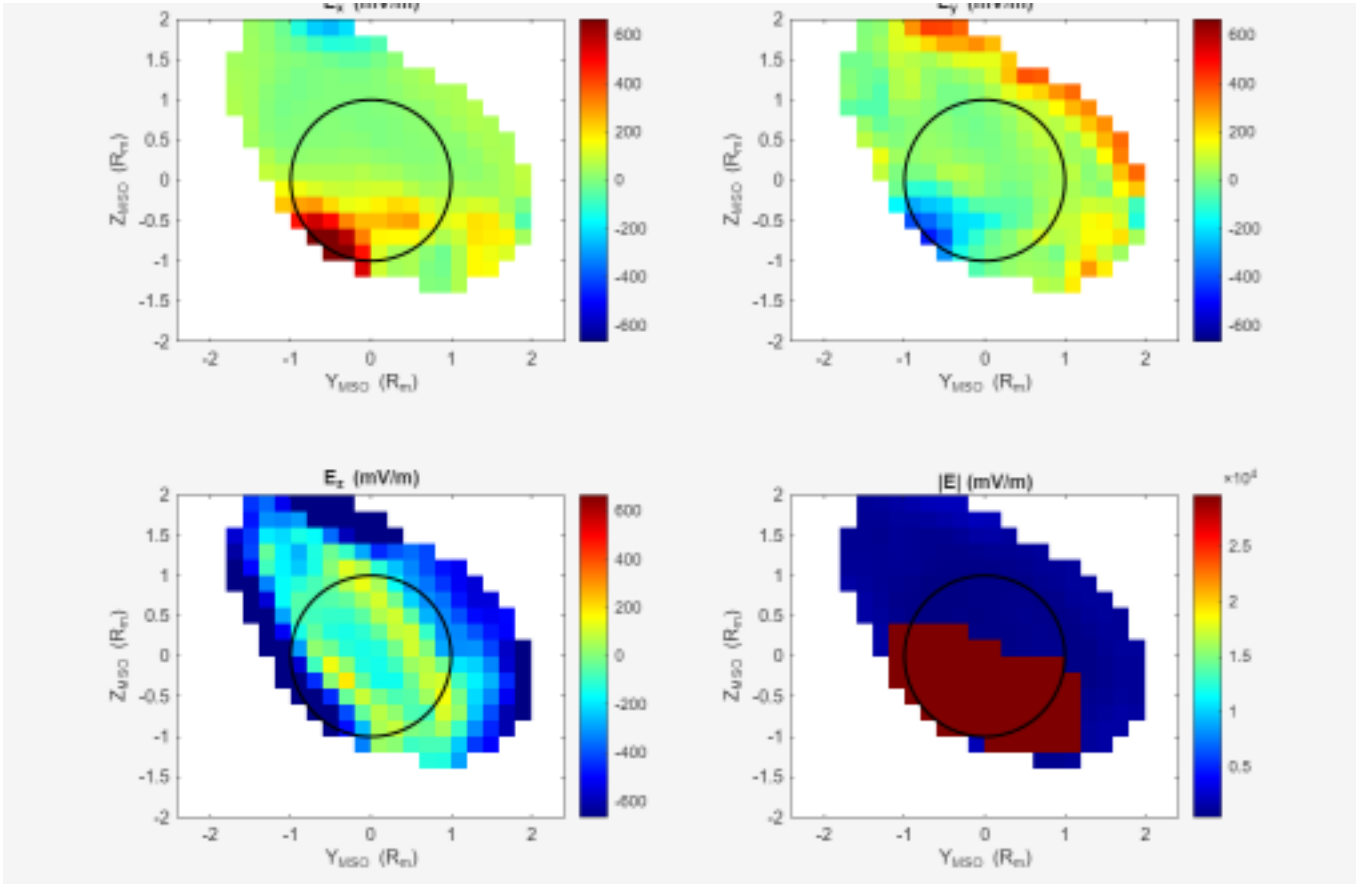

Magnetic field map in the XY plane, showing B_x , B_y , B_z and $|B|$ in nT.

FIGURE 11

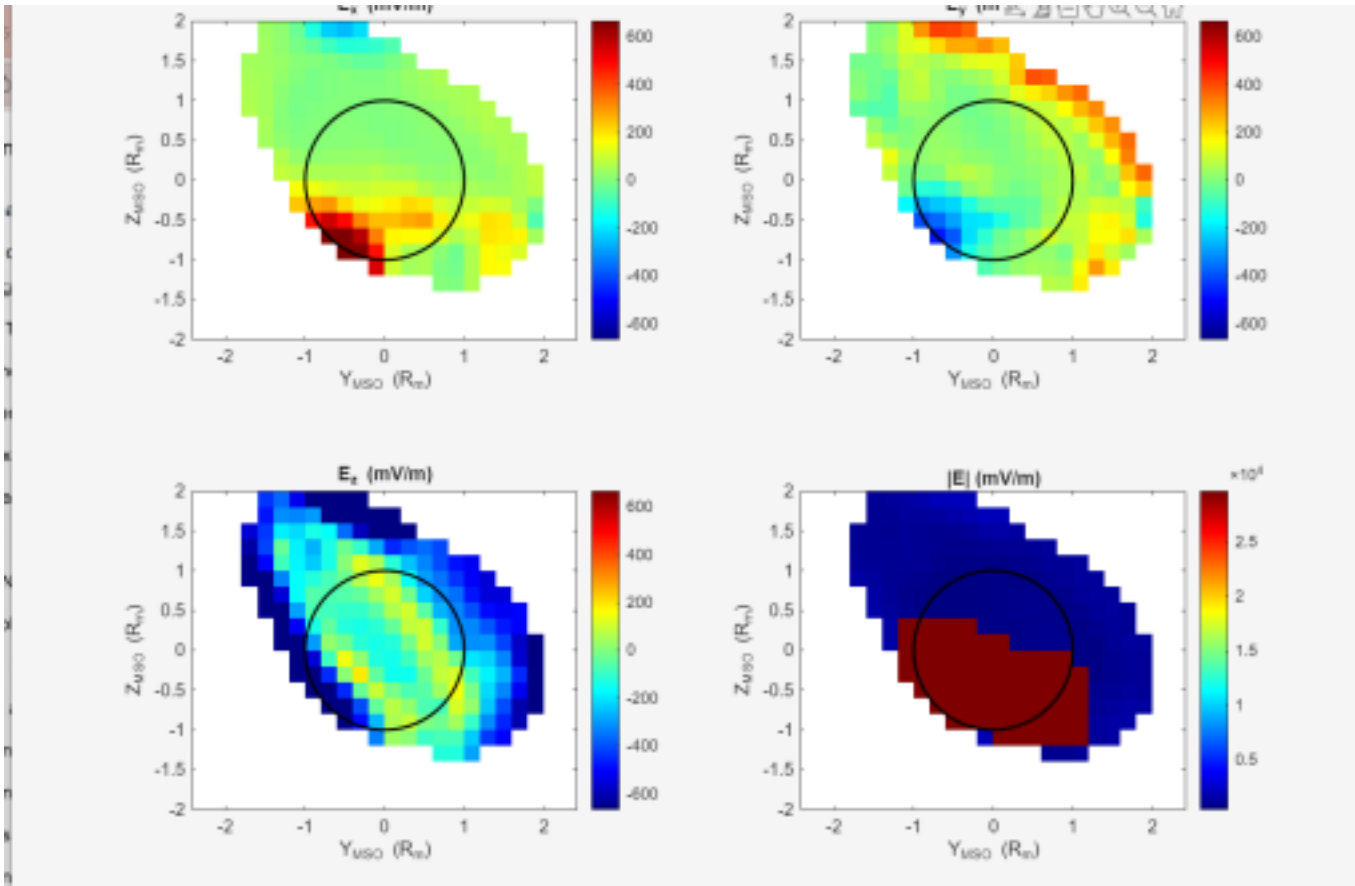

Convective electric field map in the XZ plane, showing E_x , E_y , E_z and $|E|$ in mV/m. Description matched to the

FIGURE 12

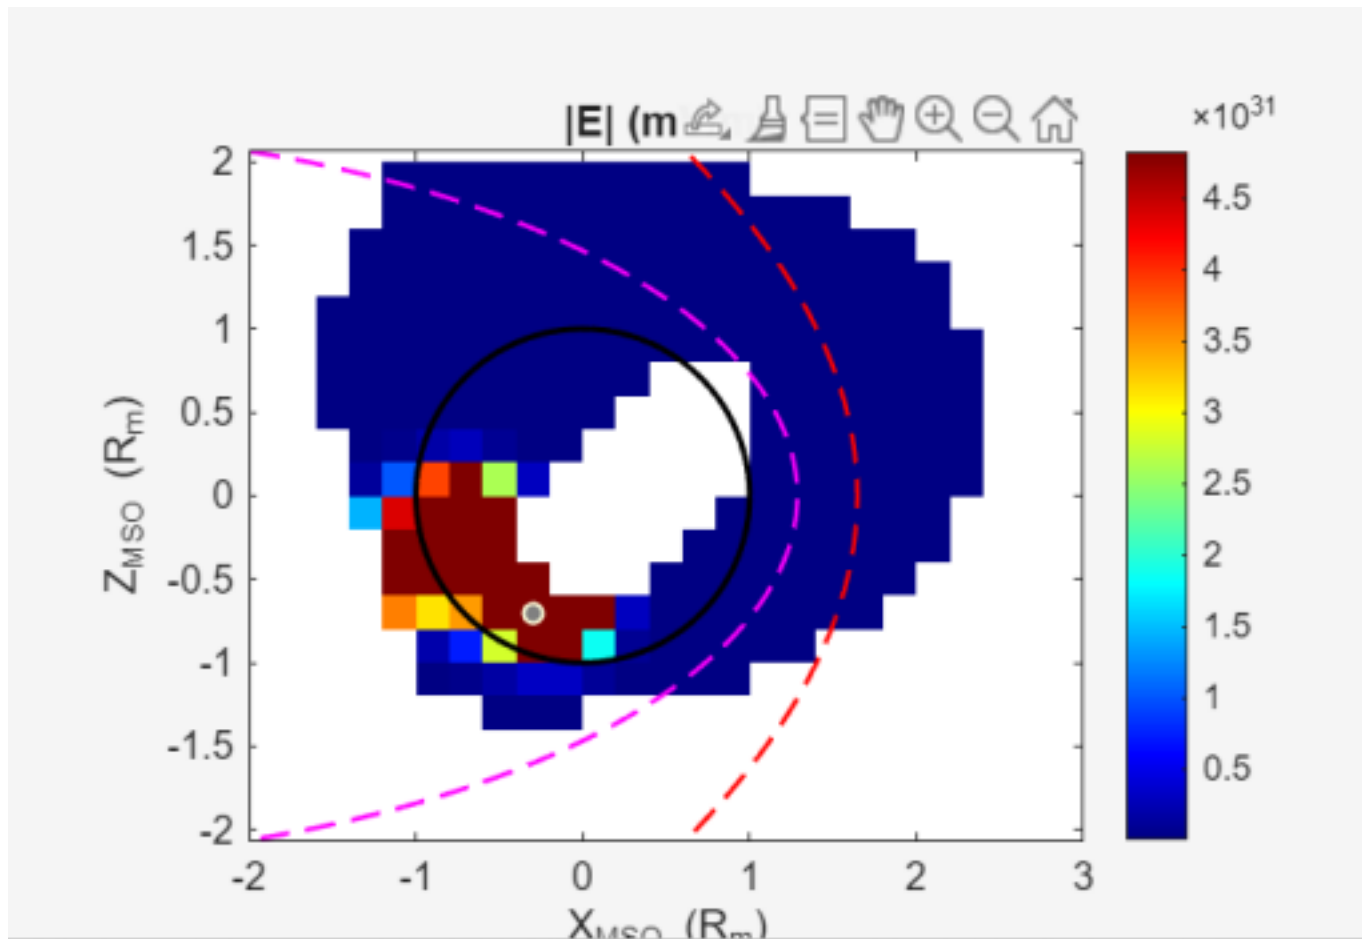

Convective electric field map in the YZ plane, showing E_x , E_y , E_z and $|E|$ in mV/m. Description matched to the

FIGURE 13

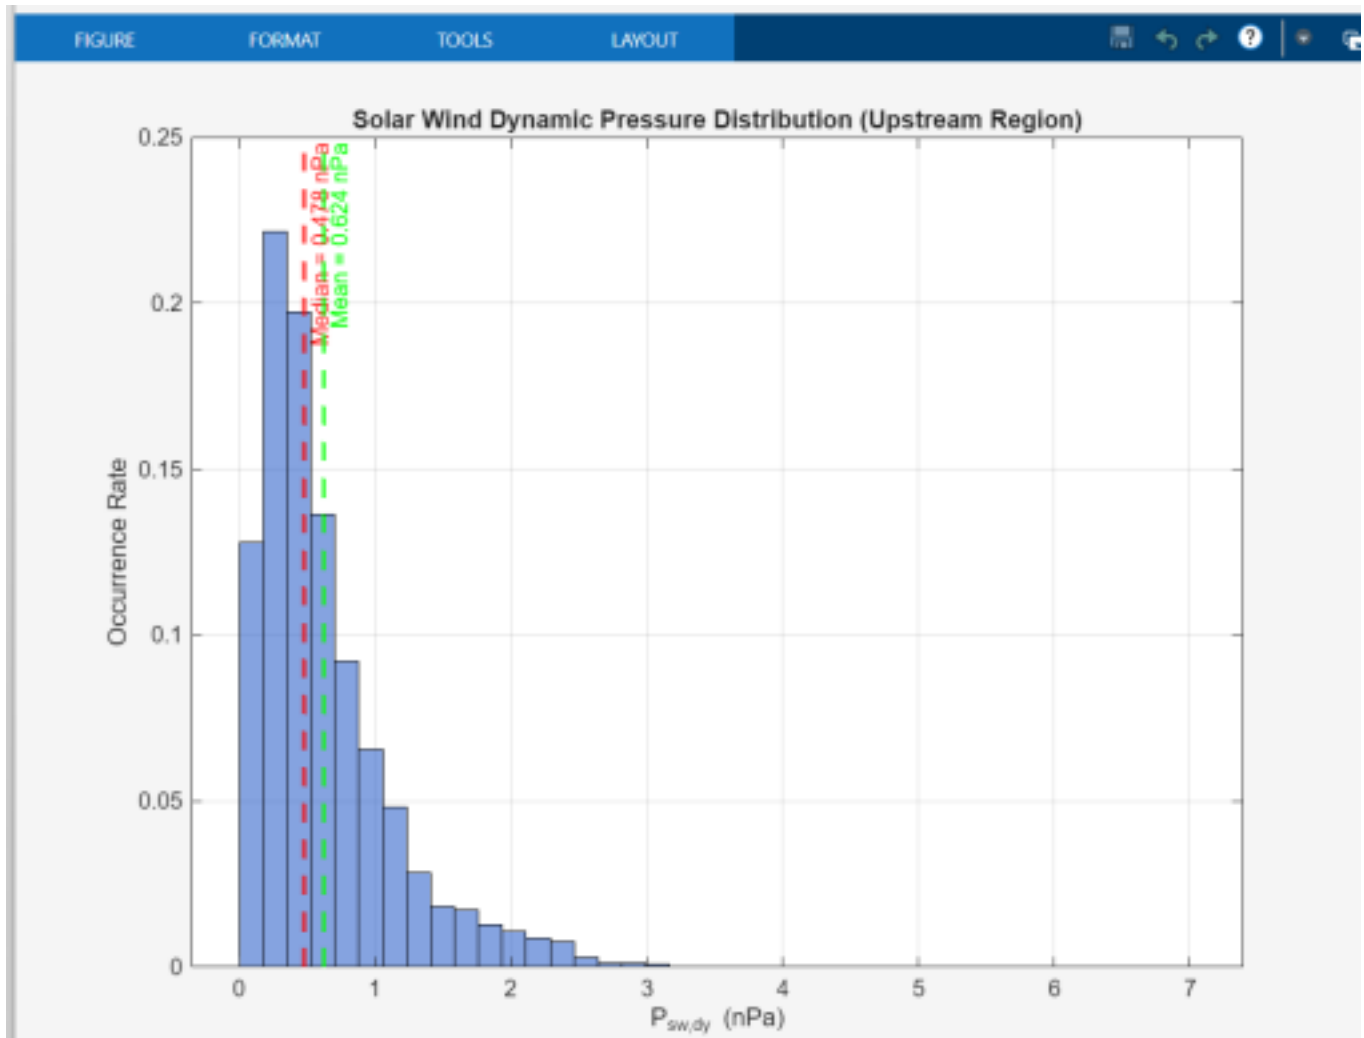

Convective electric field map in the YZ plane, showing E_x , E_y , E_z and $|E|$ in mV/m. Description matched to the

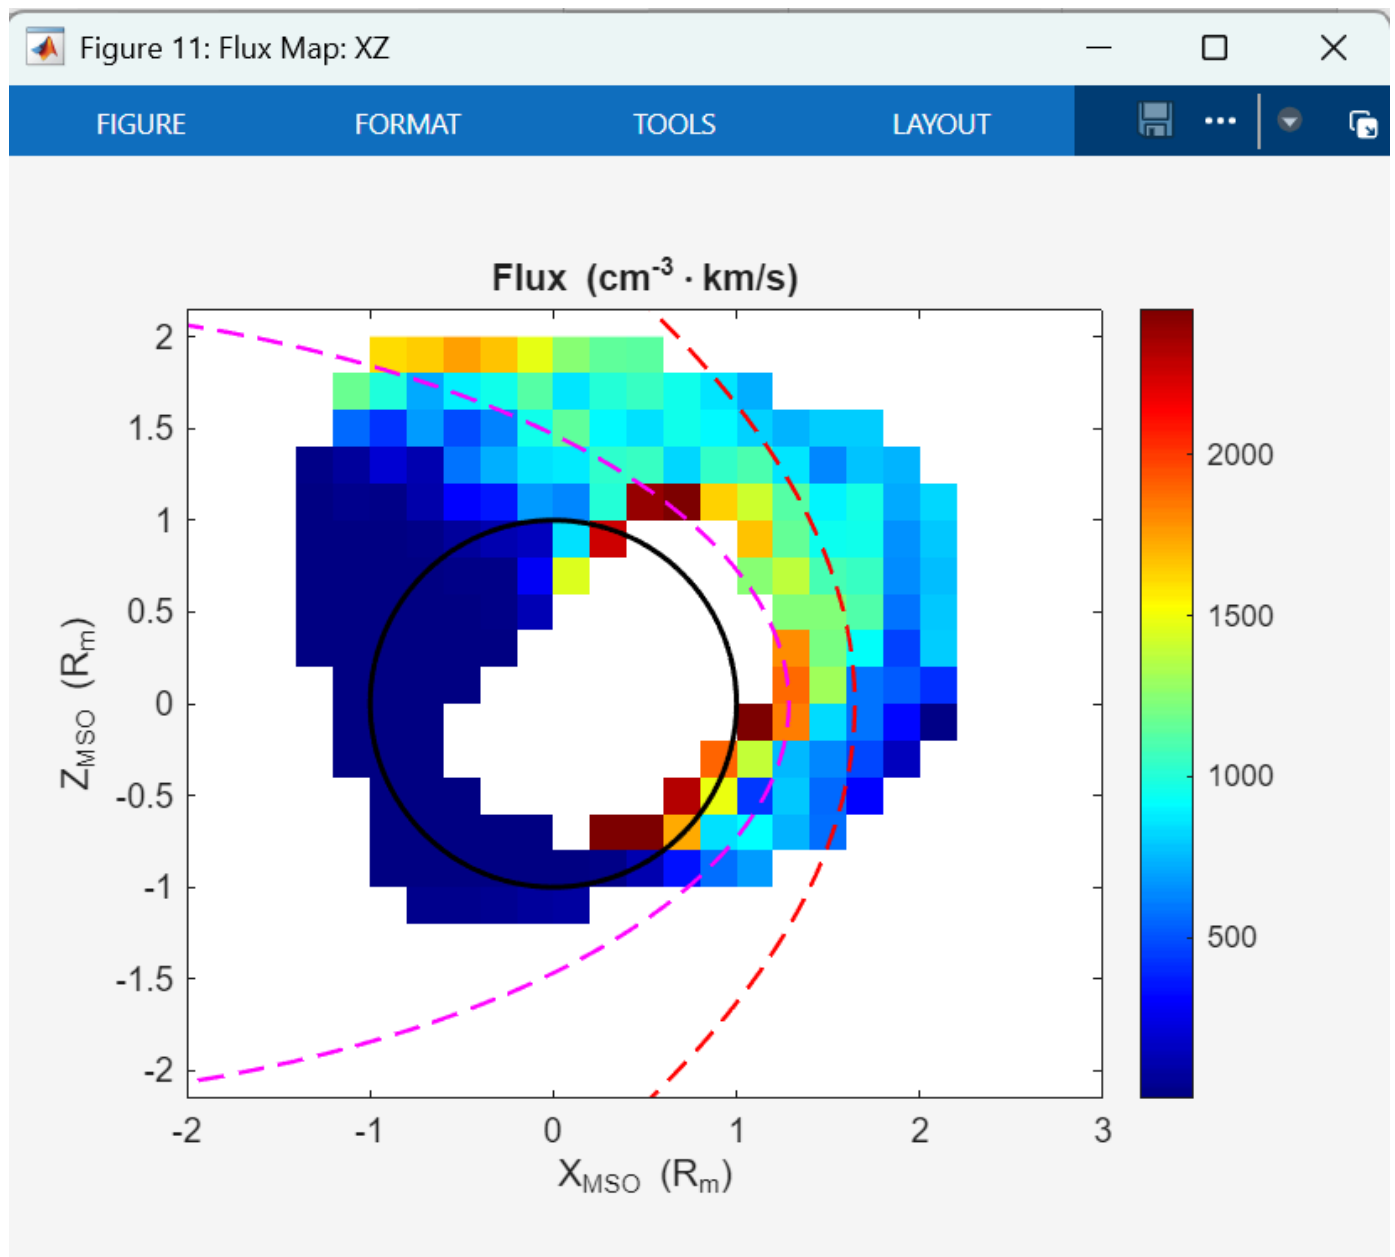

FIGURE 14

Convective electric field magnitude map in the XZ plane, shown with the magnetospheric boundary overlays.

FIGURE 15

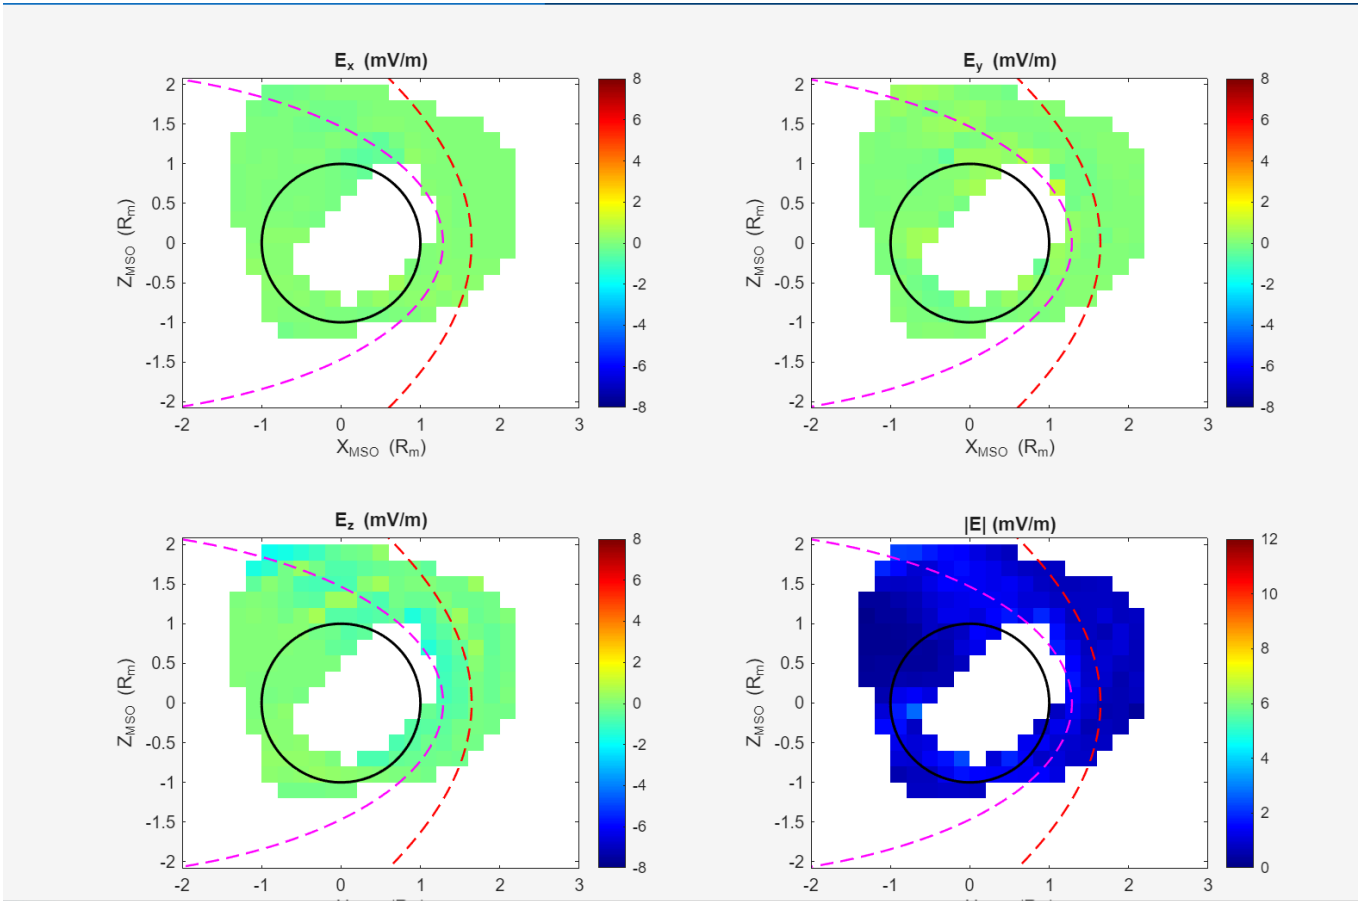

Solar-wind dynamic-pressure histogram for the upstream region, with median and mean markers. [Description](#)

FIGURE 16

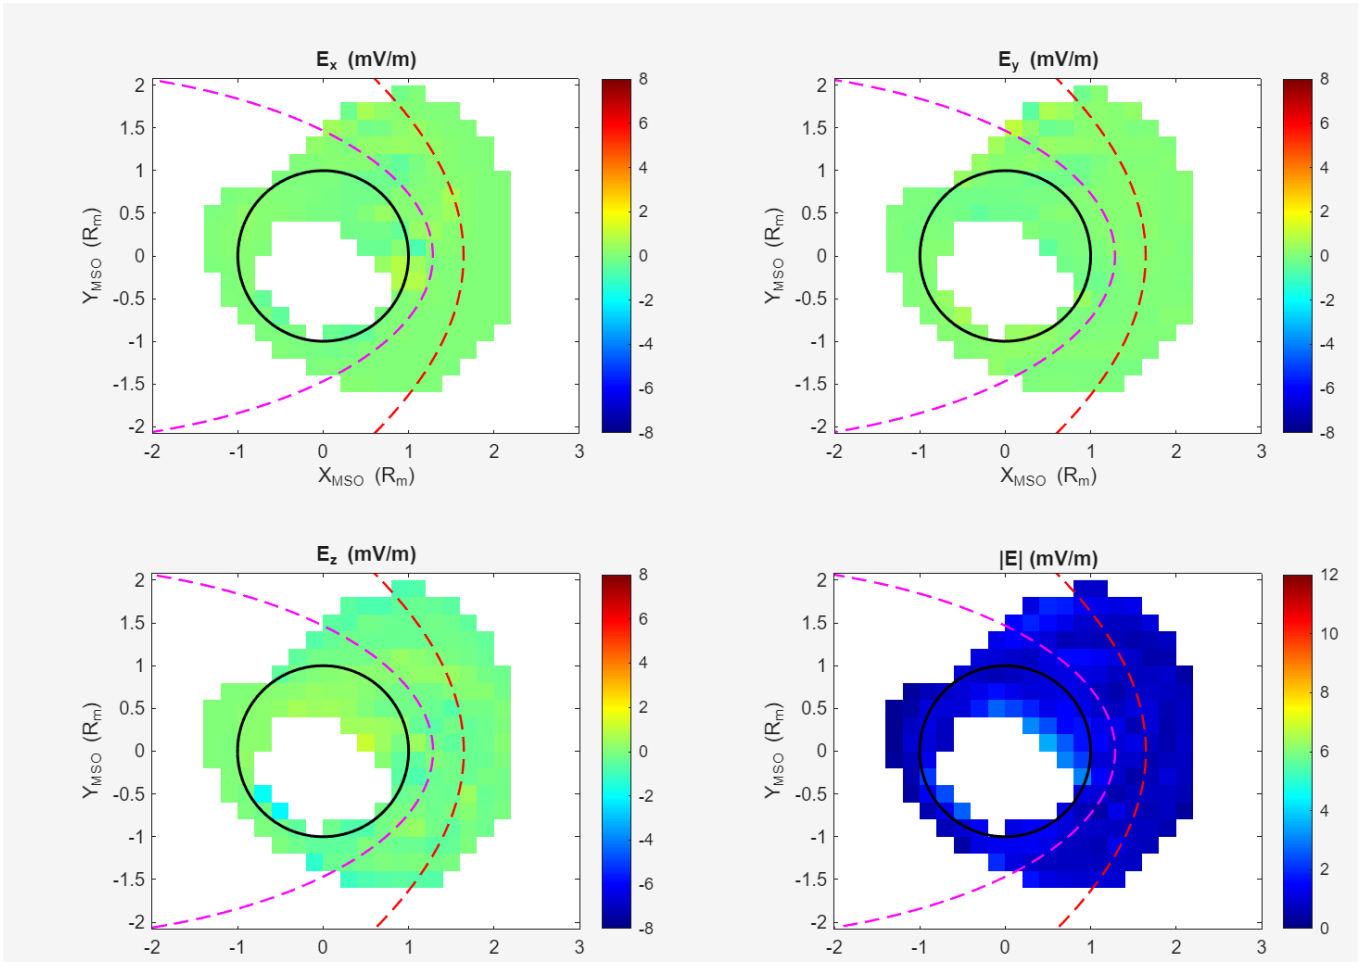

Convective electric field map in the YZ plane, showing E_x , E_y , E_z and $|E|$ in mV/m. Description matched to the

FIGURE 17

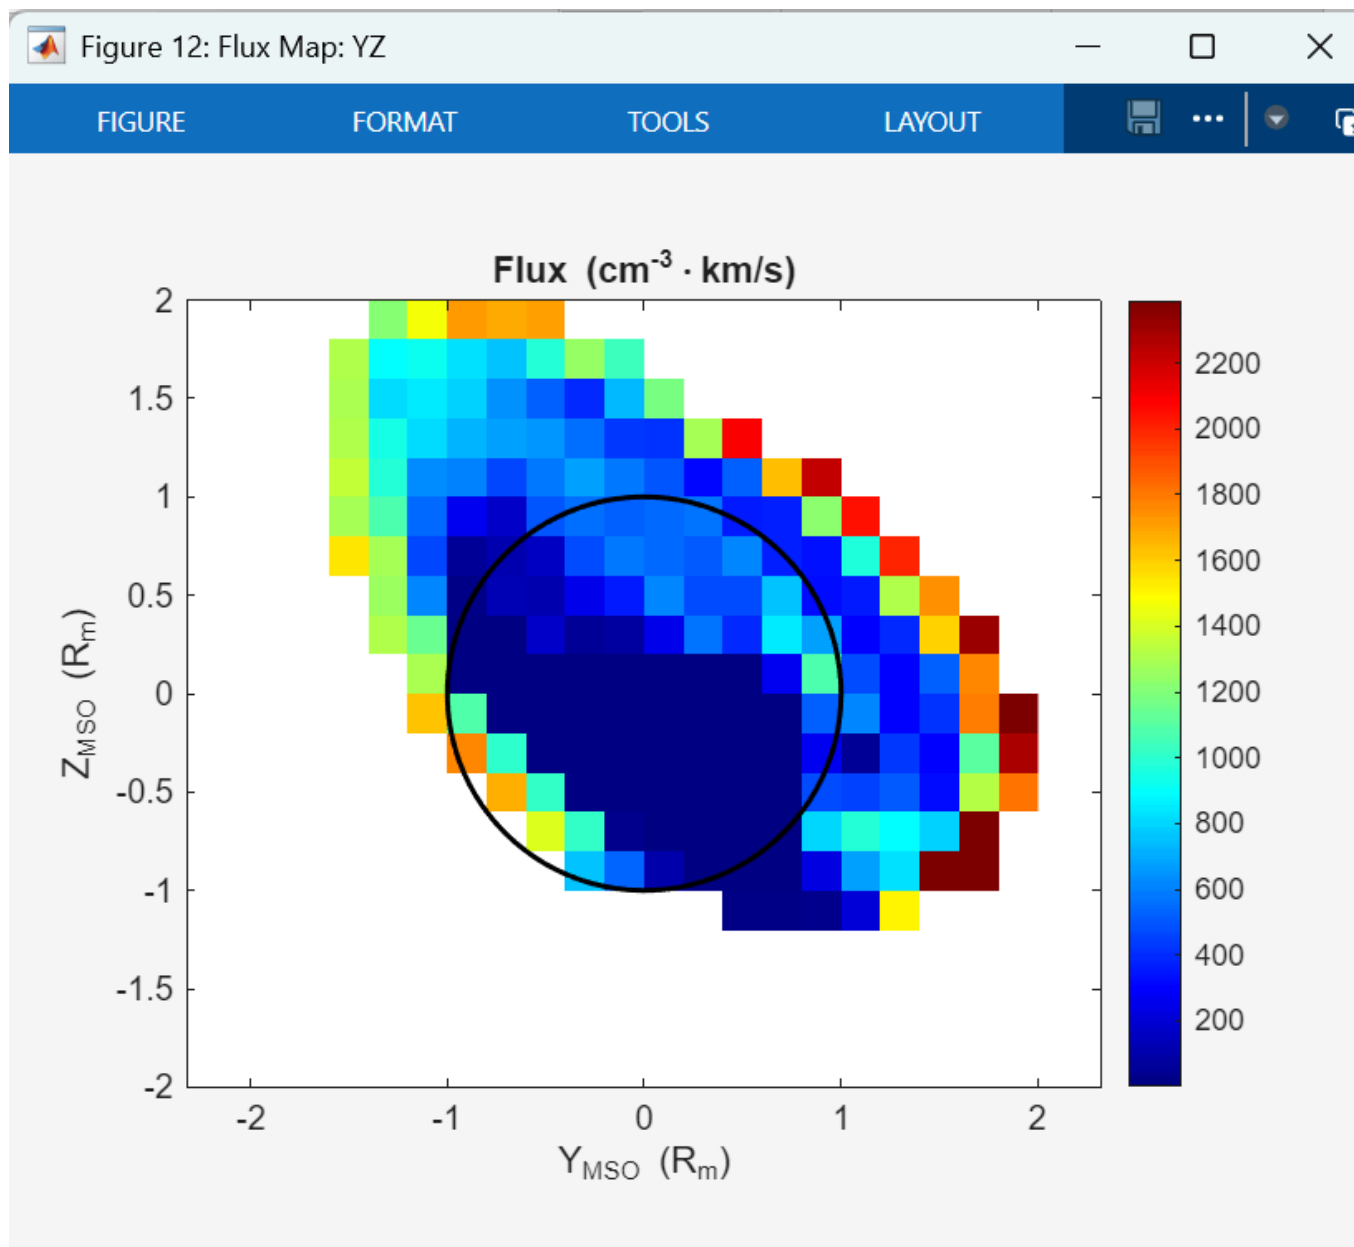

Convective electric field map in the XZ plane, showing E_x , E_y , E_z and $|E|$ in mV/m. Description matched to the

FIGURE 18

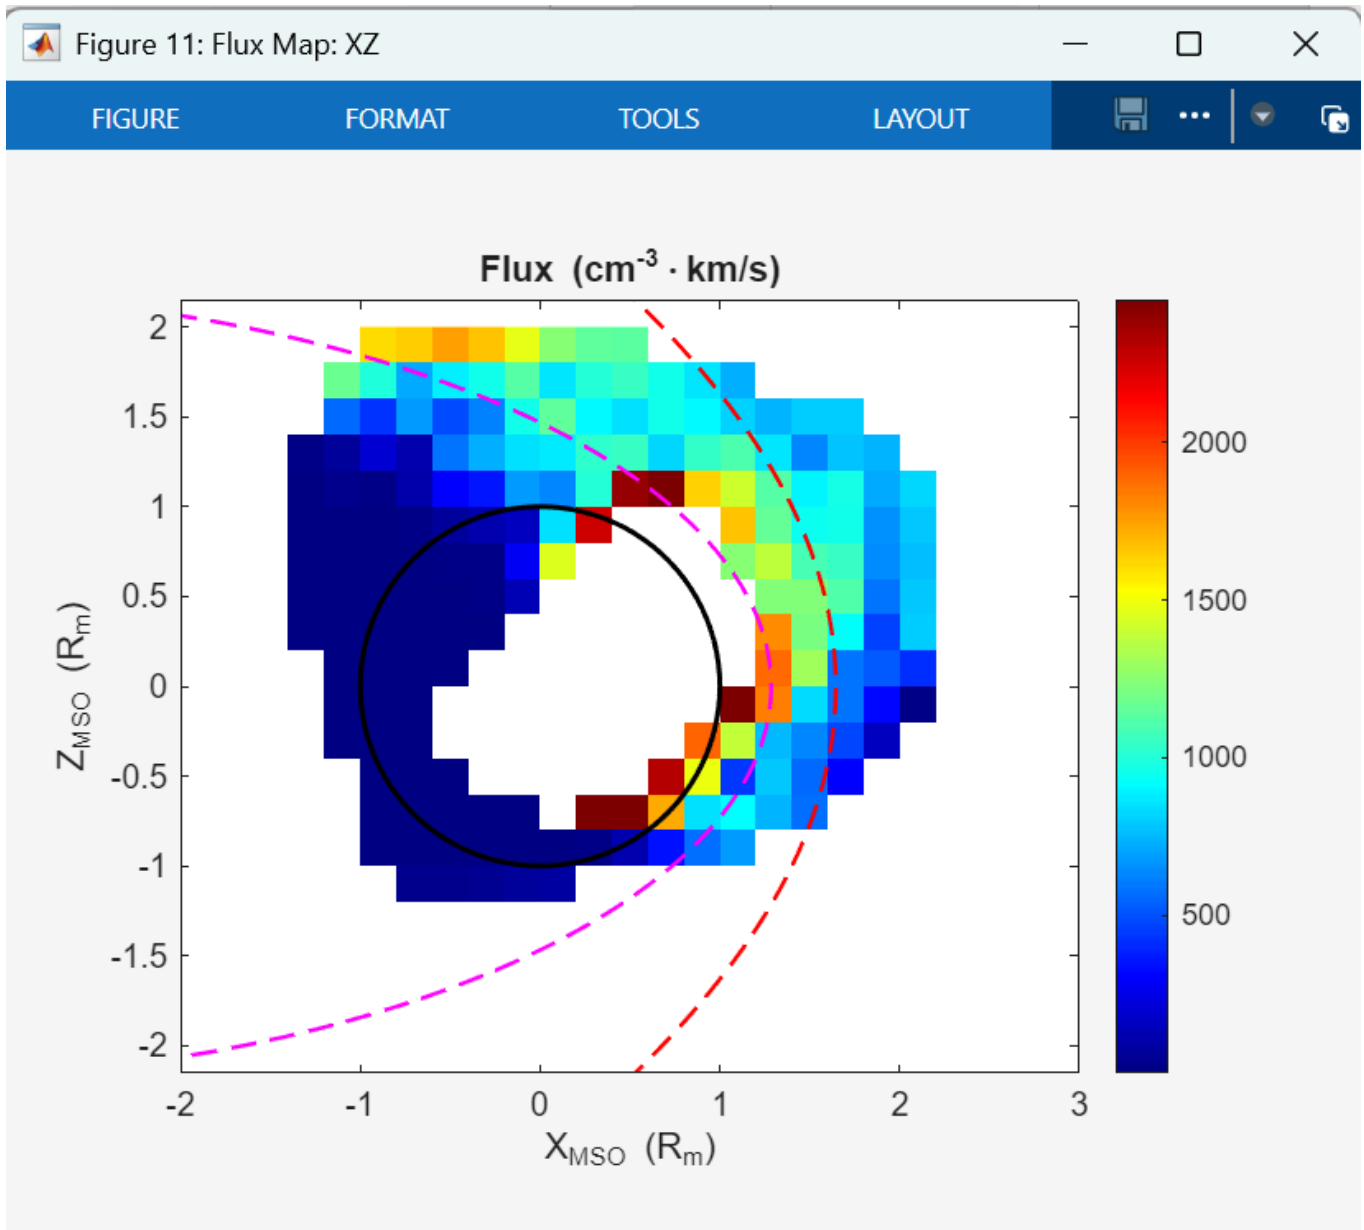

Convective electric field map in the XY plane, showing E_x , E_y , E_z and $|E|$ in mV/m. Description matched to the

FIGURE 19

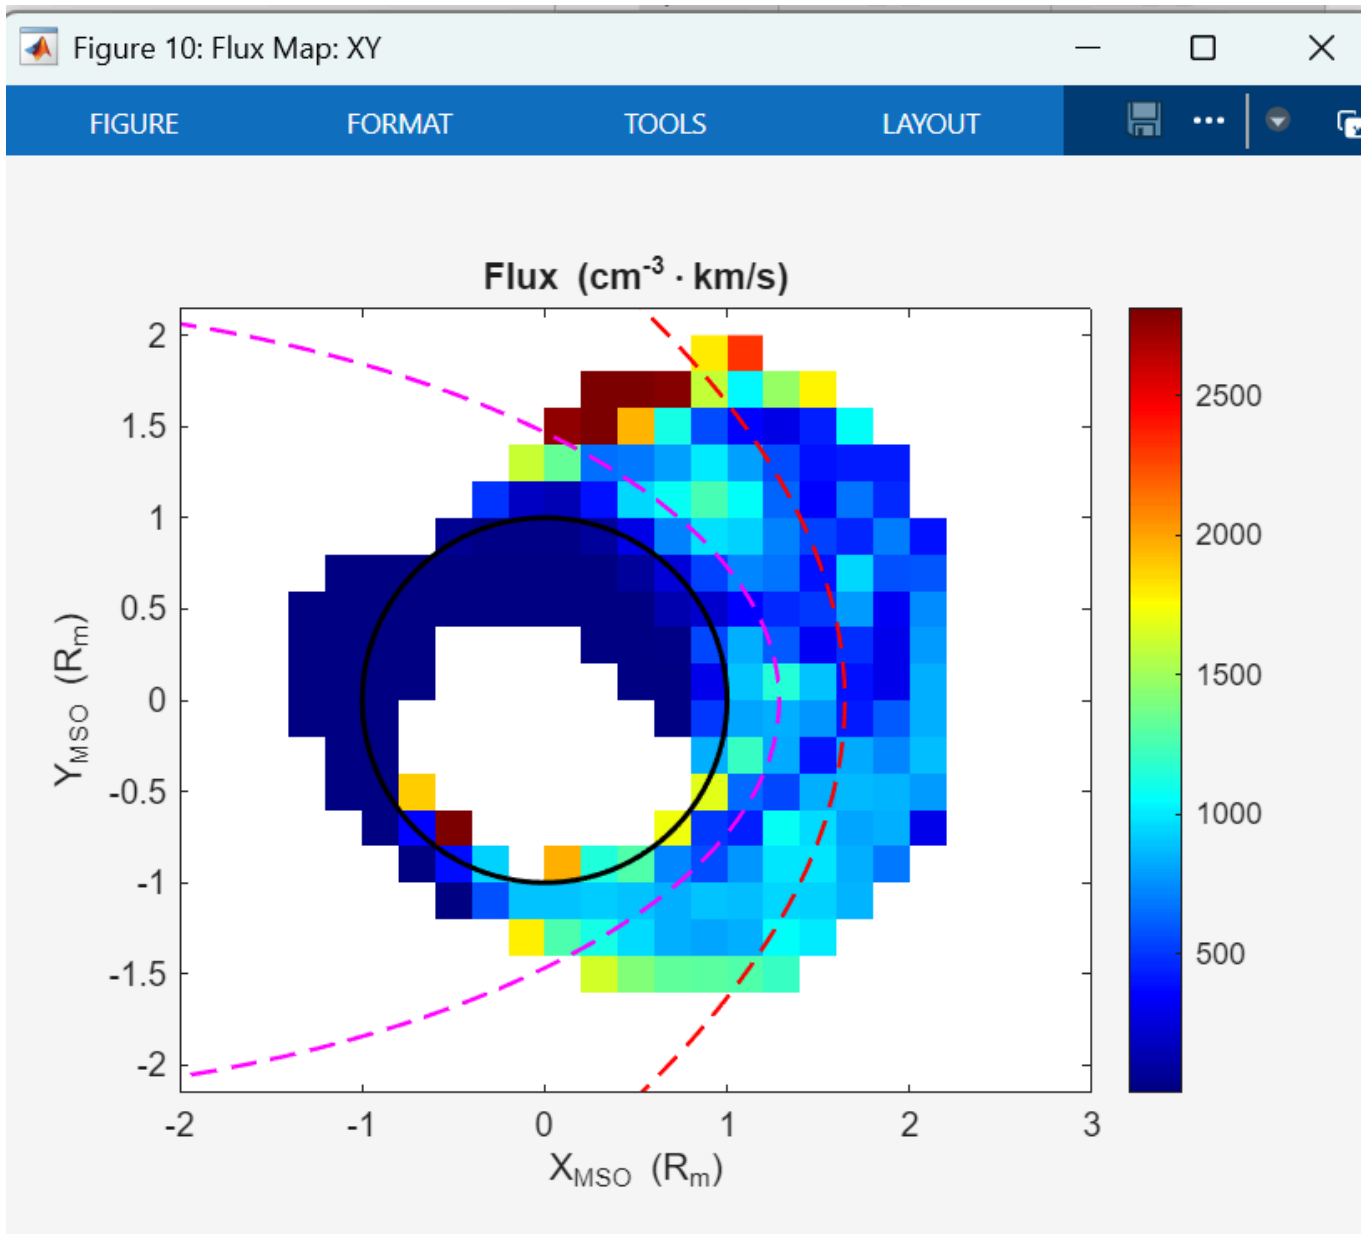

Ion flux map in the YZ plane, displaying the flux distribution across the cross-tail plane. Description matched to the

FIGURE 20

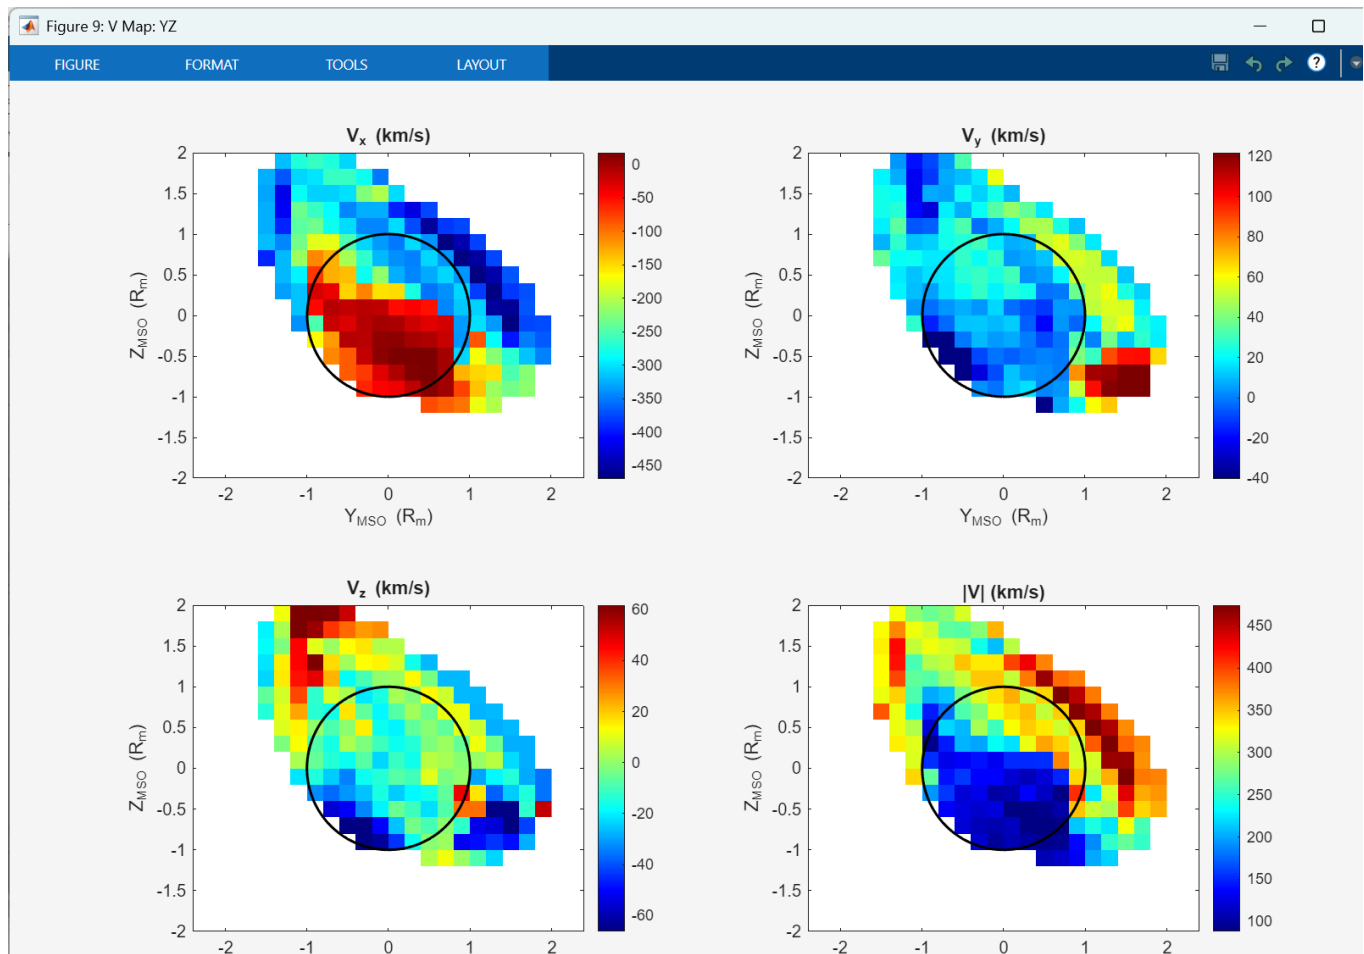

Ion flux map in the XZ plane, displaying the flux distribution along the noon–midnight meridian. [Description](#)

FIGURE 21

Ion flux map in the XY plane, displaying $n \cdot |V|$ from 0 to $2800 \text{ cm}^3 \cdot \text{km/s}$ with bow-shock and MPB overlays.

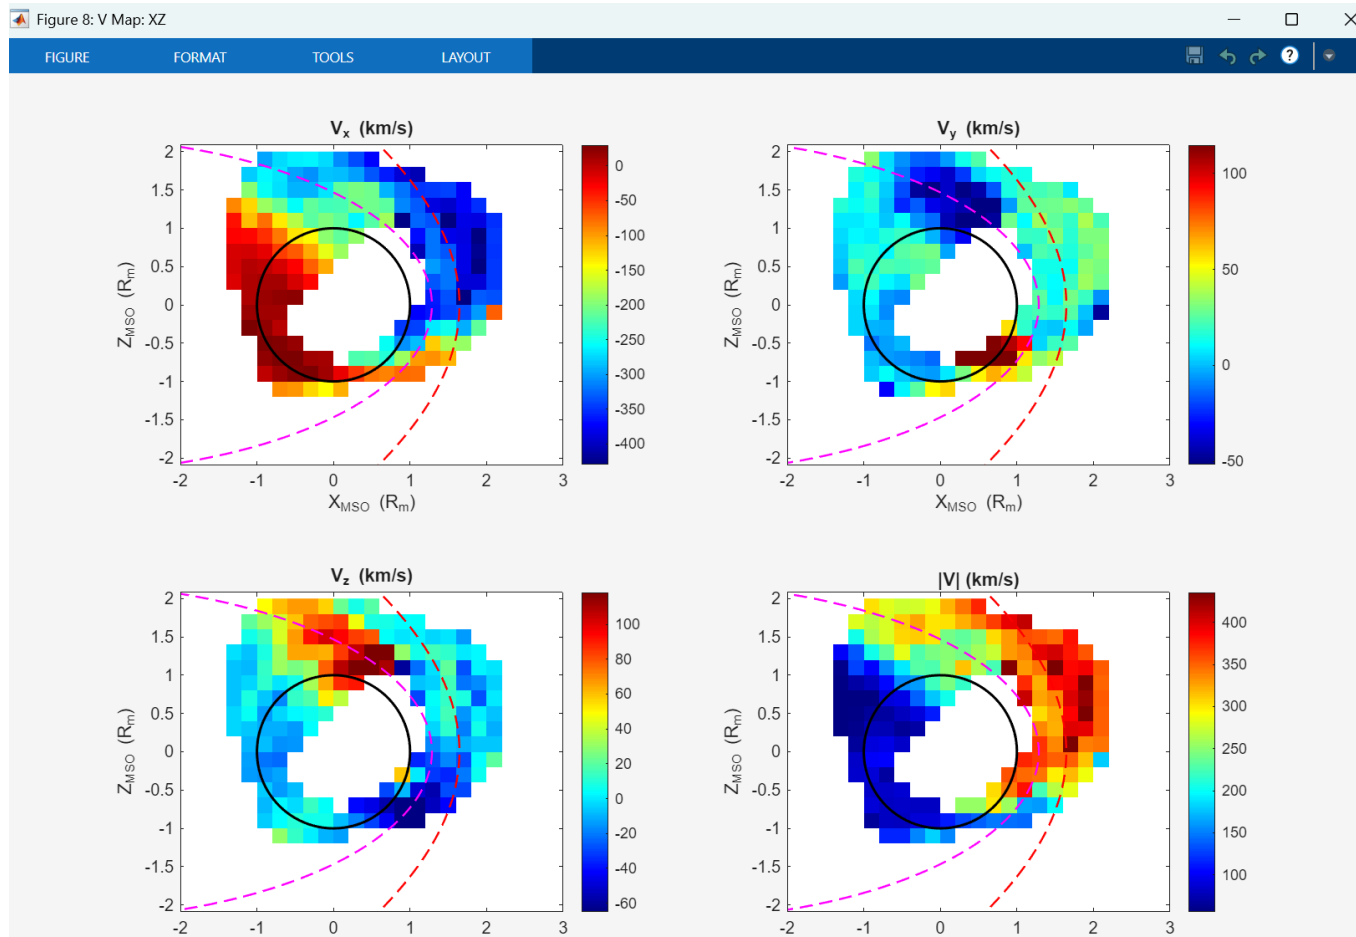

FIGURE 22

Velocity map in the YZ plane, showing V_x , V_y , V_z and $|V|$ in km/s.

VELOCITY

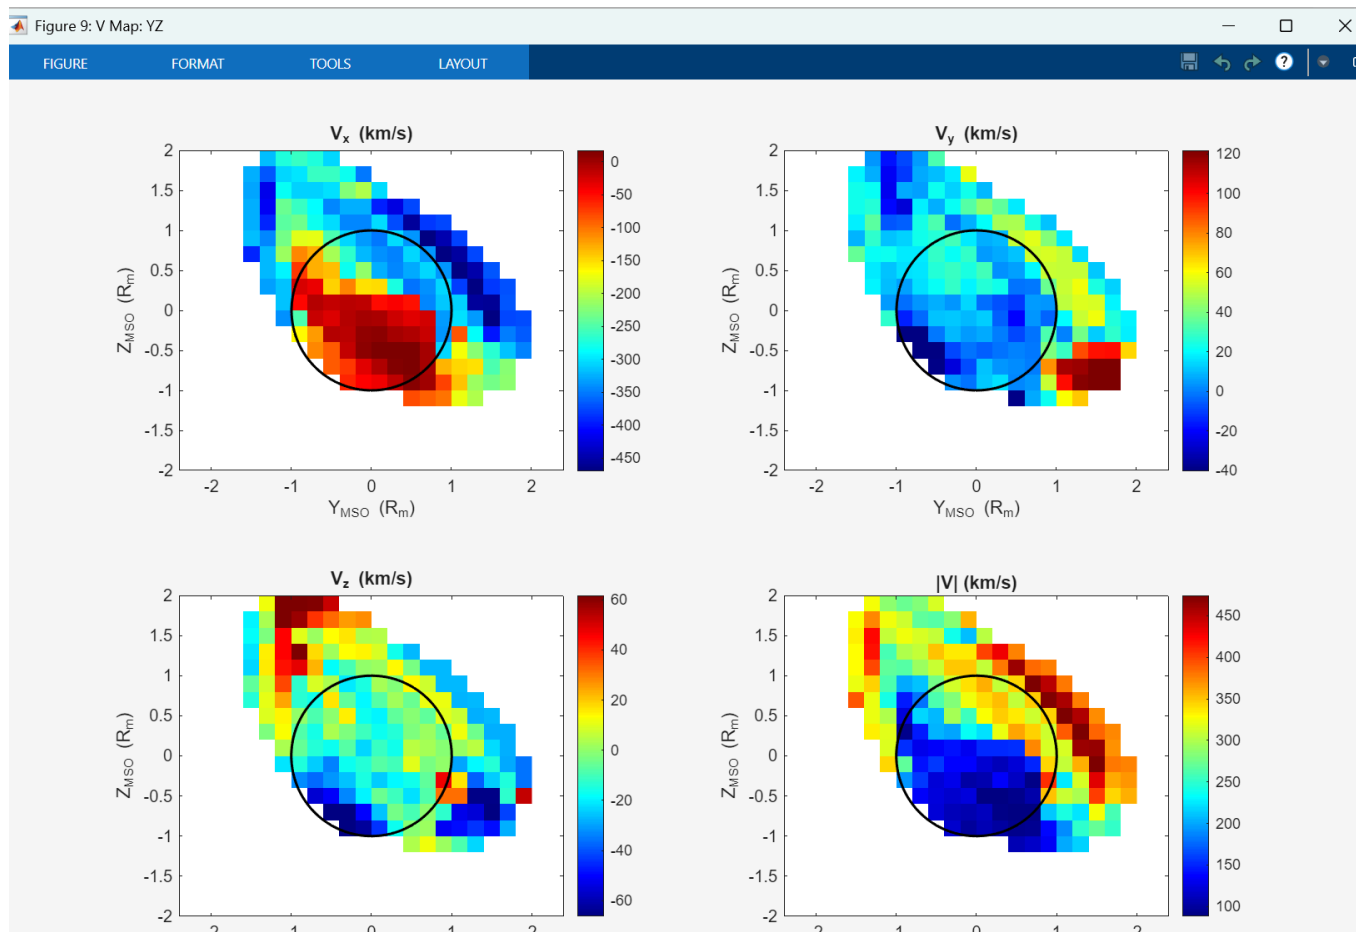

FIGURE 23

Velocity map in the XZ plane, showing V_x , V_y , V_z and $|V|$ in km/s with boundary overlays. Description matched to

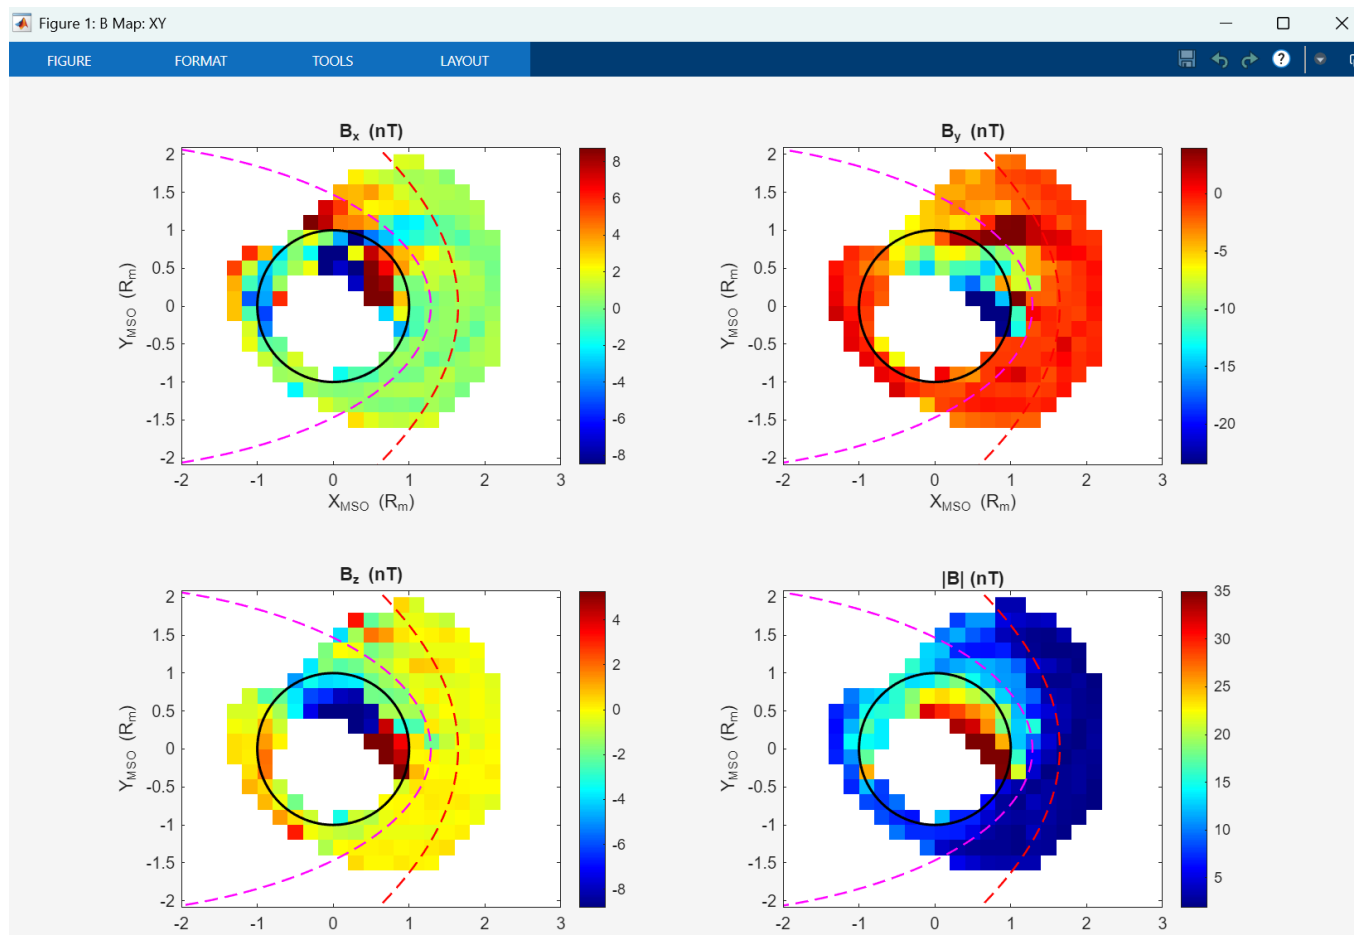

VELOCITY

FIGURE 24

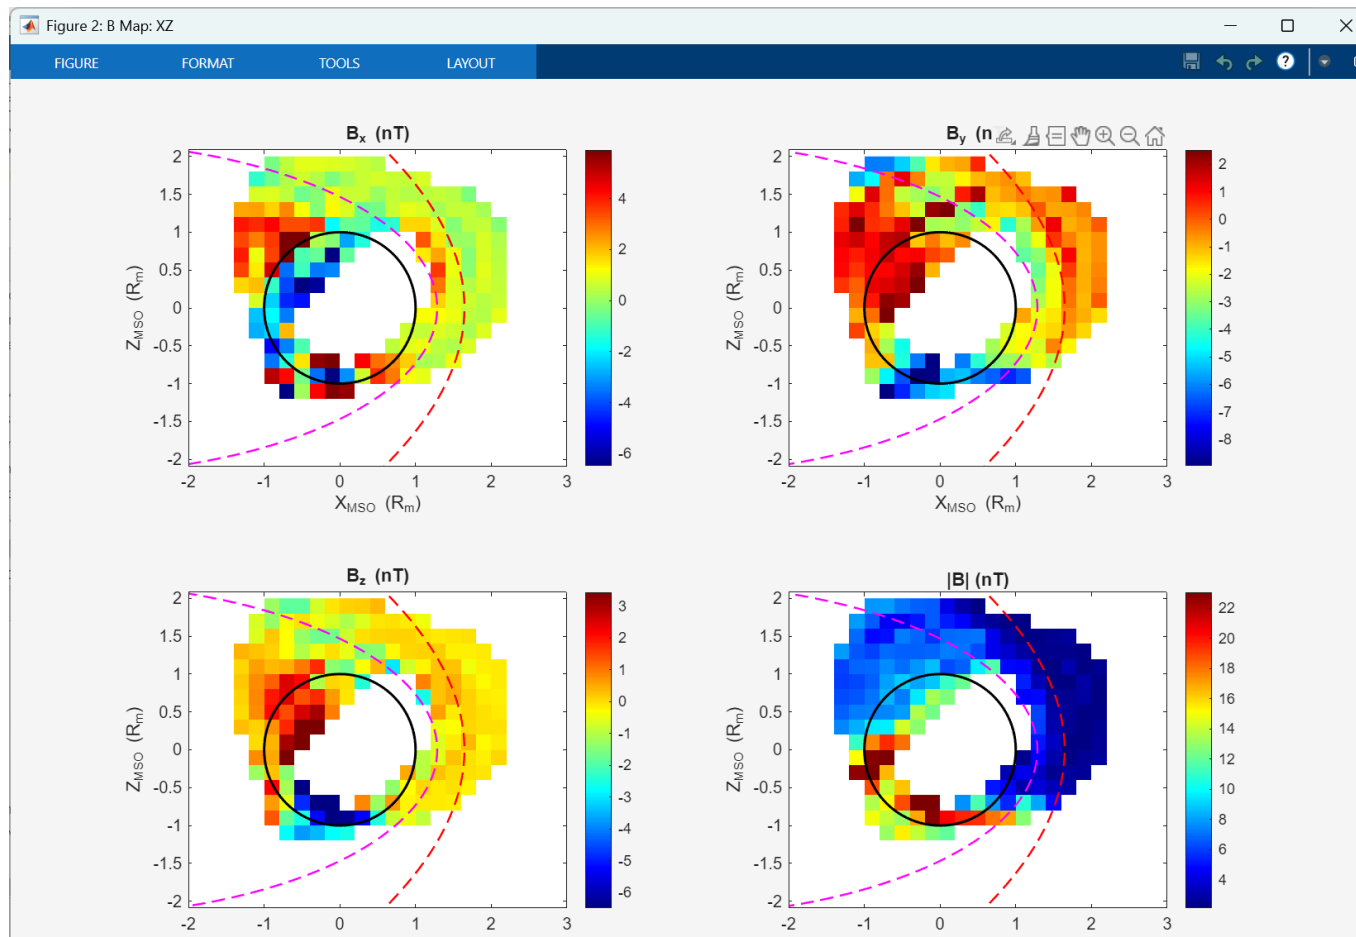

Alternate YZ-plane velocity capture, showing the four velocity components in the cross-tail projection.

FIGURE 25

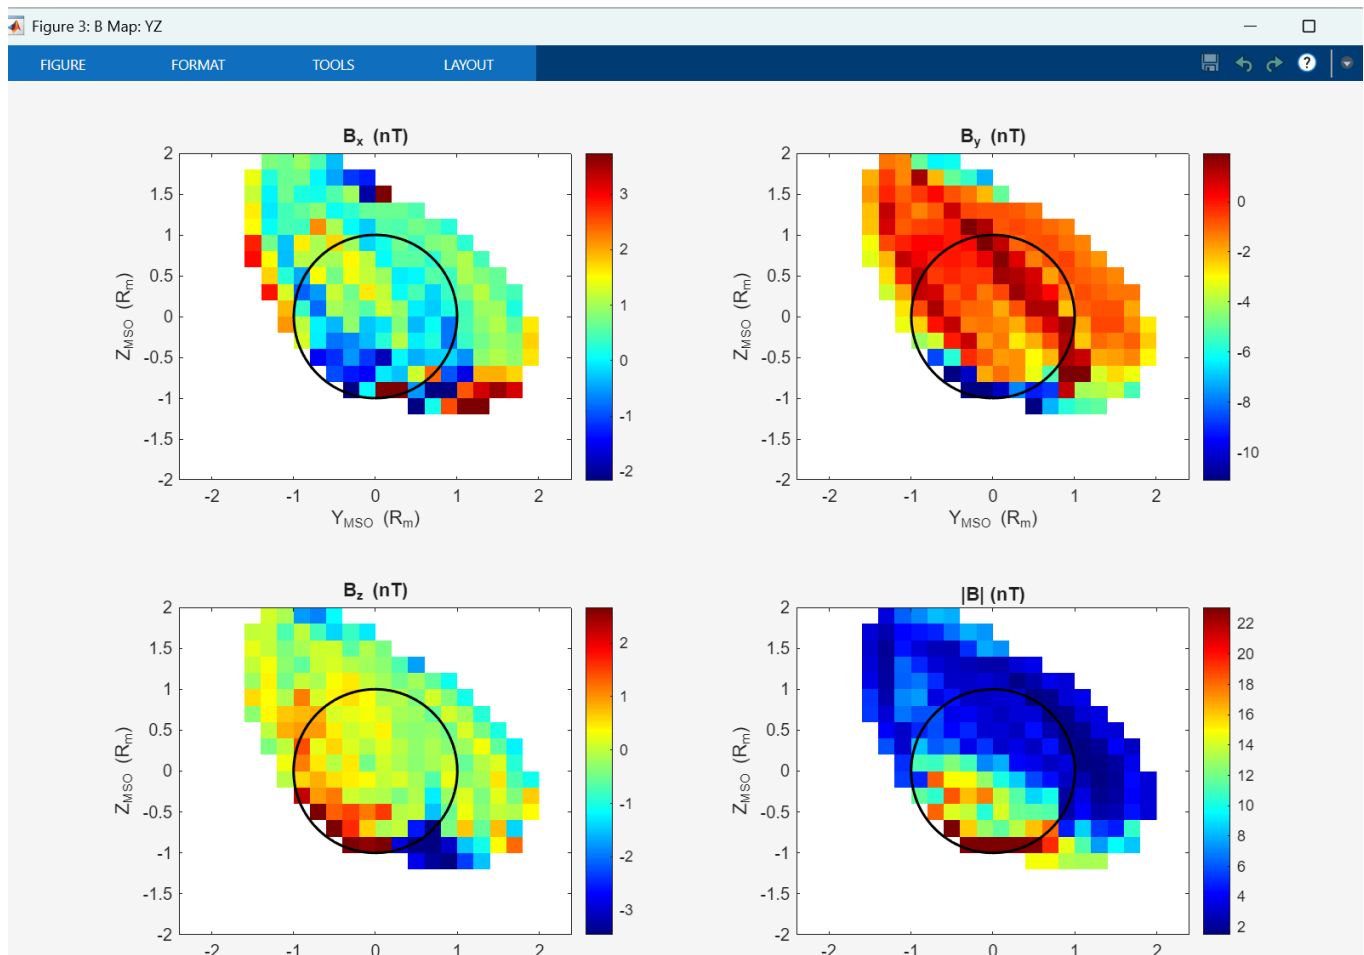

Magnetic field map in the XY plane, showing B_x , B_y , B_z and $|B|$ in nT.

FIGURE 26

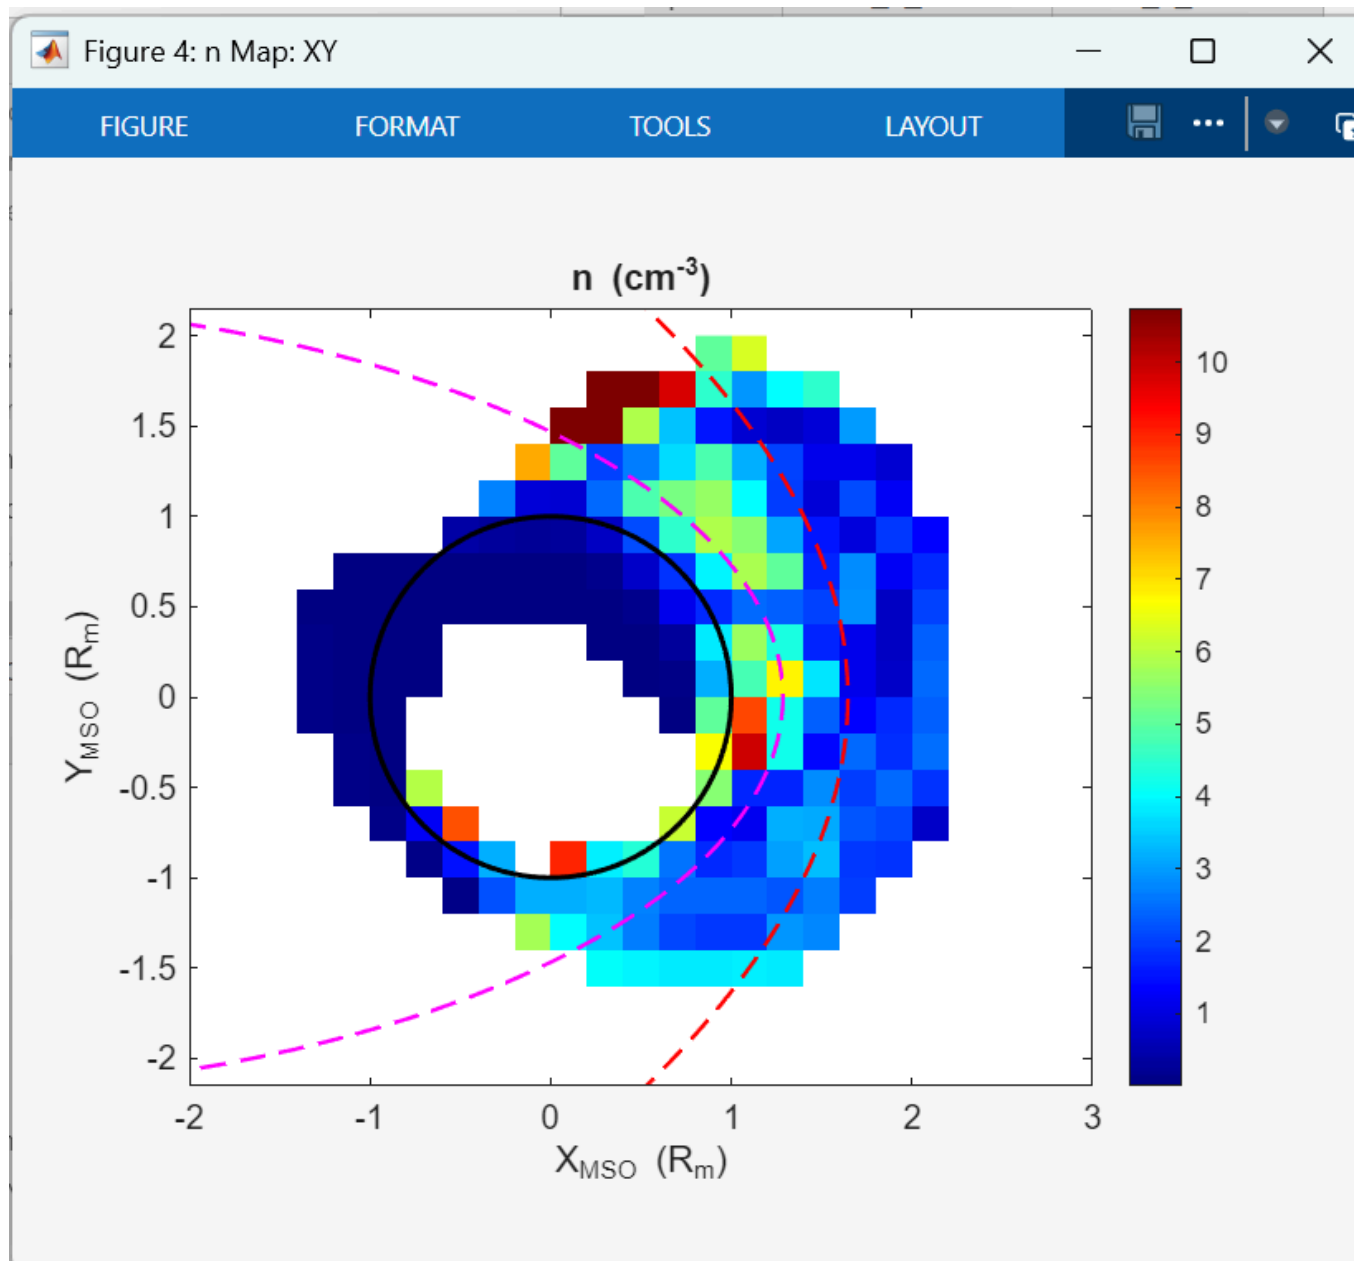

Magnetic field map in the XZ plane, showing B_x , B_y , B_z and $|B|$ in nT.

MAGNETIC FIELD

FIGURE 27

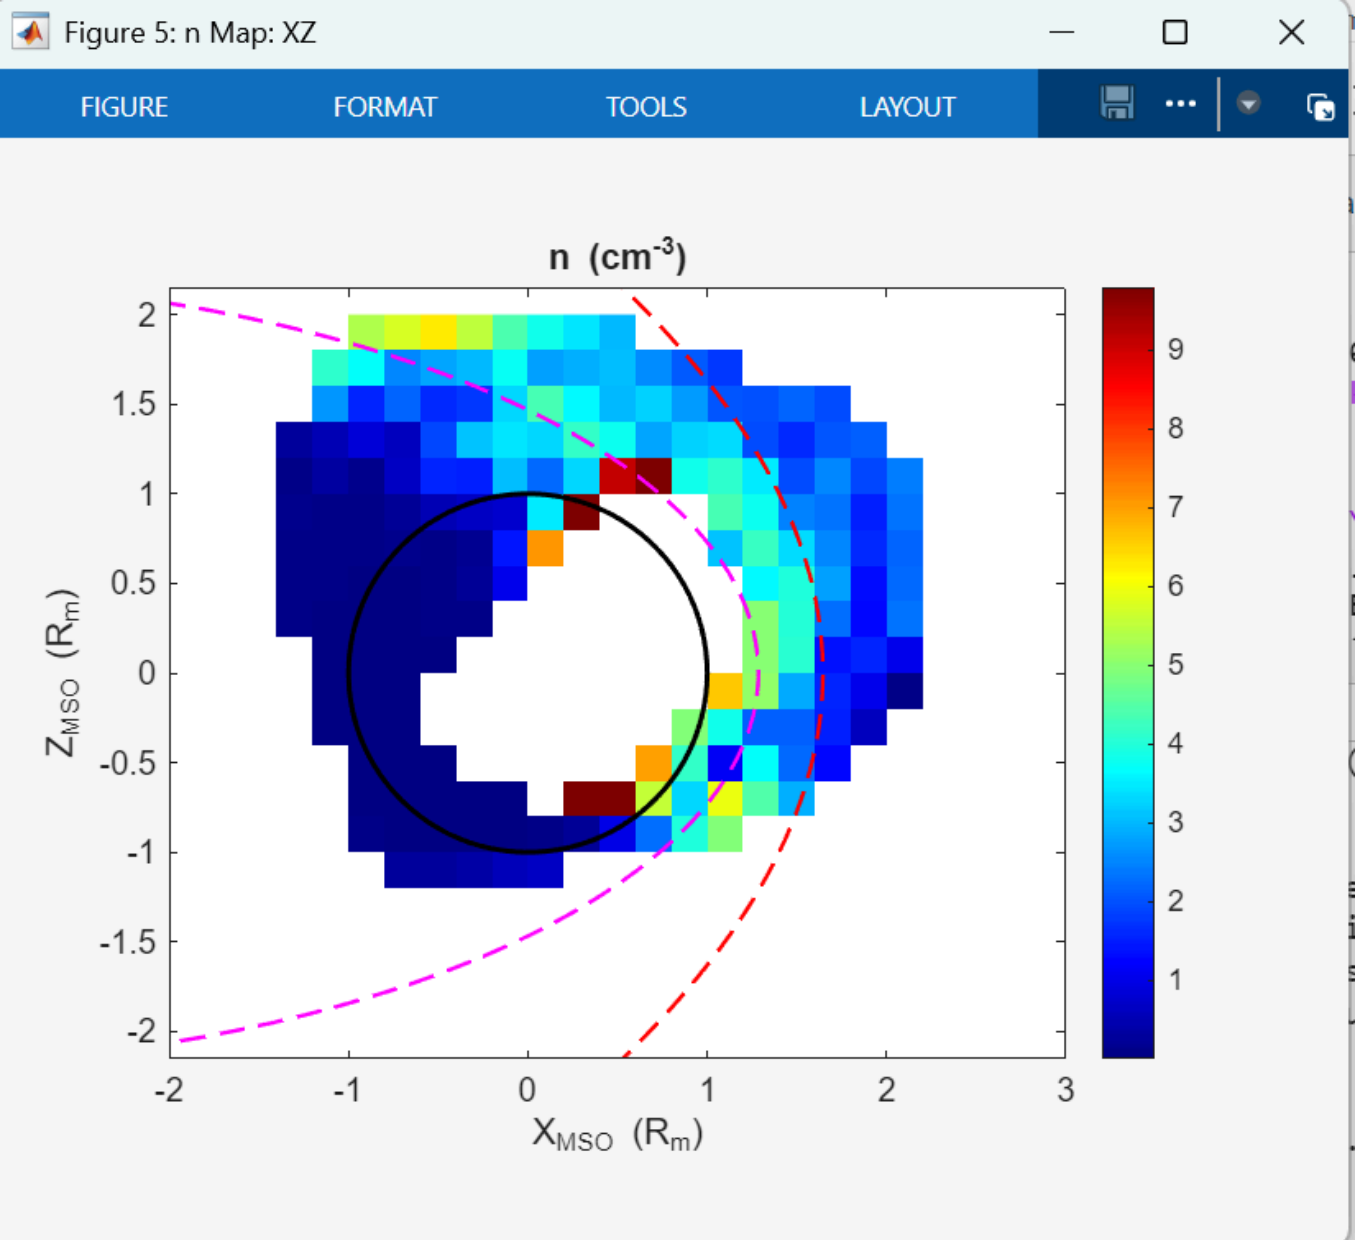

Magnetic field map in the YZ plane, showing B_x , B_y , B_z and $|B|$ in nT.

FIGURE 28

Proton density map in the XY plane, with n ranging from approximately 1 to 10 cm^{-3} .

FIGURE 29

Proton density map in the XZ plane, with n ranging from approximately 1 to 9 cm^{-3} .
